STATE OF NEW MEXICO, ex rel., DALE BURGETT,

Petitioner,

vs.

| No. | | | |
|-----|--|--|--|
| | | | |

PAUL BIDERMAN, Secretary of Energy & Minerals, a Department of the State of New Mexico,

Respondent.

PETITION FOR WRIT OF MANDAMUS

Petitioner alleges:

- Petitioner is a citizen and resident of Hidalgo
 County, New Mexico.
- 2. Respondent is the Secretary of the Department of Energy and Minerals, a Department of the State of New Mexico.
- 3. Petitioner is engaged in the greenhouse business in Animas, New Mexico, employing a geothermal water source to raise roses and other flowers.
- 4. Respondent is required by law to administer funds granted by the New Mexico Legislature, Laws of New Mexico, 1980, Chap. 134, for the purpose of funding "geothermal demonstration projects" (emphasis supplied).
- 5. Respondent's predecessor in office issued a Reguest for Proposals and Administrative Policies and Procedures

governing the applications for geothermal demonstration funds, attached to this petition as Exhibits "A" and "B".

- 6. Dona Ana Co., Inc., purporting to be a corporation qualified to do business in New Mexico, applied for a grant by application dated April 15, 1982, seeking to "[U]tilize existing geothermal wells either drilled by Hunt in the Radium Springs area or from tested wells in an unnamed area of New Mexico" to grow roses.
- 7. On April 29, 1982, Dona Ana Co., Inc., filed an amended grant application which deleted the words "or from tested wells in an unnamed area of New Mexico," thereby limiting its proposal to the utilization of "existing geothermal wells drilled by Hunt in the Radium Springs Area".
- 8. On or about June 24, 1982 the Respondent's predecessor awarded a grant and signed a contract with Dona Ana Co.,
 Inc., a copy of which is attached to this petition as
 Exhibit "C".
- 9. Said proposal and contract were not in conformity with the Respondent's Request for Proposals and Administrative Policies and Procedures in a number of major respects, including, but not limited to, the following:
 - a) The Contract negotiations were not completed by May 28, 1982.
 - b) The proposal contained no justification that
 the project could not be undertaken without state

funding.

The contract did not require that purchase of equipment funded by the grant would be governed by the procedures set forth in the New Mexico State Purchasing Act, \$13-1-1 et. seq., NMSA

(1978).

- 10. In October of 1983, Tom Beall (hereinafter, the contractor) advised the Respondent that it wished to abandon its project for the Radium Springs area (Dona Ana County, New Mexico) and utilize the grant funds previously awarded it to develop a new project right next to the Petitioner's greenhouses near Animas, New Mexico (Hidalgo County). This project would duplicate the Petitioner's business operation, utilizing the same geothermal well field and putting the resourse to the same beneficial use, namely the greenhouse production of roses.
- 11. Dona Ana Co., Inc., was never incorporated in New Mexico, either as a domestic or foreign corporation, and therefore cannot legally do business in the state of New Mexico. Tom Beall, the principal incorporator of said company, is a resident of the state of Washington.
- 12. The contract between Dona Co., Inc., is a nullity, since the contractor was never qualified to do business in the state of New Mexico nor does it have a gross receipts tax number registered with the Department of Taxation and Revenue, a requirement of said contract.
 - 13. The Respondent cannot legally transfer funds

contracted for by Dona Ana Co., Inc., to the Beall Co. of N.M., Inc., and/or Tom Beall or allow the new contractor to utilize such funds for a new project in Animas, New Mexico.

- 14. Since the new project proposed for funding would be a duplication of the Petitioner's existing business operation, it is not a "demonstration" project, and the transfer of funds under the contract to the proposed new project would be contrary to the express statutory language limiting funding to geothermal "demonstration" projects.
- 15. If the Beall Co. of N.M, Inc., is permitted to receive funds previously contracted for by Dona Ana Co., Inc., to develop the Radium Springs project, which was the only project presented in its final proposal of March 29, 1982, the Petitioner will be denied equal protection and due process of law, since he was advised in June of 1982 that he could not submit a proposal for a geothermal greenhouse in Animas, New Mexico because the deadline for proposals had expired as of April 30, 1982.
- 16. The Respondent has a non-discretionary duty to administer state funds in a manner which does not violate the laws and constitution of the State of New Mexico, and if he is not restrained by a writ of mandamus he will violate both those laws and constitutional provisions cited herein.
- 17. Petitioner is a person "beneficially interested" in the issues raised by this petition, namely the proposed

illegal and unconstitutional expenditure of state funds, generally as a citizen of this state and specifically as a person who will be economically damaged by the grant of state funds to an out-of-state competitor who intends to establish a state-subsidized business of the same type and location as the Petitioner's business.

18. Petitioner has no plain, speedy and adequate remedy at law.

WHEREFORE, Petitioner prays that it be awarded a Writ of Mandamus commanding Respondent to:

- 1) Comply with its non-discretionary duty to cancel the contract with Dona Co., Inc., and to refuse to grant funds to Tom Beall or Beall Co. of N.M., Inc.for the development of a geothermal greenhouse in Animas, New Mexico.
- 2) Pay to Respondent the damages that it sustained as a result of the unlawful conduct together with all costs and fees.

Respectfully submitted:

ROBERT N. HILGENDORF

CERTIFIED MAIL

RETURN RECEIPT REQUESTED

Mr. Dale Burgett

Box 265A

Animas, N.M. 88020

Dick wants to
talk to you
about this

Dear Mr. Burgett:

On June 2, 1986, you received notice that New Mexico Water Quality Control Commission (WQCC) regulations require an approved discharge plan for your greenhouse operation discharging geothermal waters onto the surface of the ground.

Pursuant to Sections 3-104 and 3-106 of the WQCC regulations, you were required to file a discharge plan by September 30, 1986, or to request an extension of time for good cause. Your are hereby notified that the regulations allow you to discharge without an approved discharge plan for an additional 120 days, or until January 28, 1987, at which time all discharges will cease. Continued discharge will result in legal action by the Oil Conservation Division.

Enclosed is another copy of discharge plan guidelines for the geothermal This form needs to be submitted morder to appliance a dusthage plan for operation. A If you have any questions, contact Jami Bailey in Santa Fe at your 827-5884.

Sincerely,

R. L. STAMETS
