Describe Cause of Problem and Remedial Action Taken.* Legacy spills at plugged well and out-of-service tank battery.

Describe Area Affected and Cleanup Action Taken.* Affected area is approximately 20' X 100' at well and 200' X 300' at tank battery. Cleanup is proposed by scraping soil from affected areas to achieve NMOCD recommended remediation action levels, collect confirmation soil samples and restore surface to New Mexico State Land Office requirements. Contaminated soil will be transported to an NMOCD permitted surface waste management or disposal facility.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
