**Describe Cause of Problem and Remedial Action Taken.\***

The spill at this site is considered to be approximately 5 - 10bbls. The cause of the leak was a flowline failure which was quickly repaired. No remedial action taken yet. The remediation plan is to remove contaminated soil and dispose of at nearest NMOCD approved disposal site. This plan will be implemented upon NMOCD approval. Please see attached photos.

**Describe Area Affected and Cleanup Action Taken.\***

The approximate area effected is 10yds ft X 30yds. The spill ran across the lease road area and along side the storage tanks. Any soil with elevated levels of chlorides will be removed. The choice of abatement is to remove contaminated soil and dispose of at the nearest NMOCD approved disposal site. in Chaves County.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
