Re: Application for Non-Standard Location
Basin Dakota Pool
San Juan 28-7 Unit #190M
2305' FSL & 2335' FEL
Unit Ltr. J, Section 27-T28N-R7W
Rio Arriba County, New Mexico

Dear Mr. Stogner,

Conoco Inc. plans to drill the above referenced well in 1999. The Basin Dakota pool rules state that this well must be located 790' from the quarter section lines. This well is staked 2305' FSL & 2335' FEL. This location places the well only 335' from the northern quarter section line and 305' from the center section line thereby requiring this application for a non-standard location order. The referenced location is an open, 160 acre Dakota infill site. In an effort to prevent waste and too effectively / efficiently develop and produce the 28-7 Unit to its fullest potential, Conoco selected this location to serve two purposes. The location will serve to accommodate both a primary, 160 acre Dakota infill, and an 80 acre Mesaverde infill withdrawal point (per Order No. R-10987-A, issued out of case No. 12069). Topography, arch, and infrastructure also played a role in limiting our location selection. The ability to access both horizons in a single wellbore will reduce development costs and surface disturbance. Please note that the location is interior to the 28-7 Unit, and does not encroach on any Unit boundaries. An application to downhole commingle (C-107A) Blanco Mesaverde and Basin Dakota will be filed concurrently (per Order No. R-10476-B, issued out of case No. 11815).

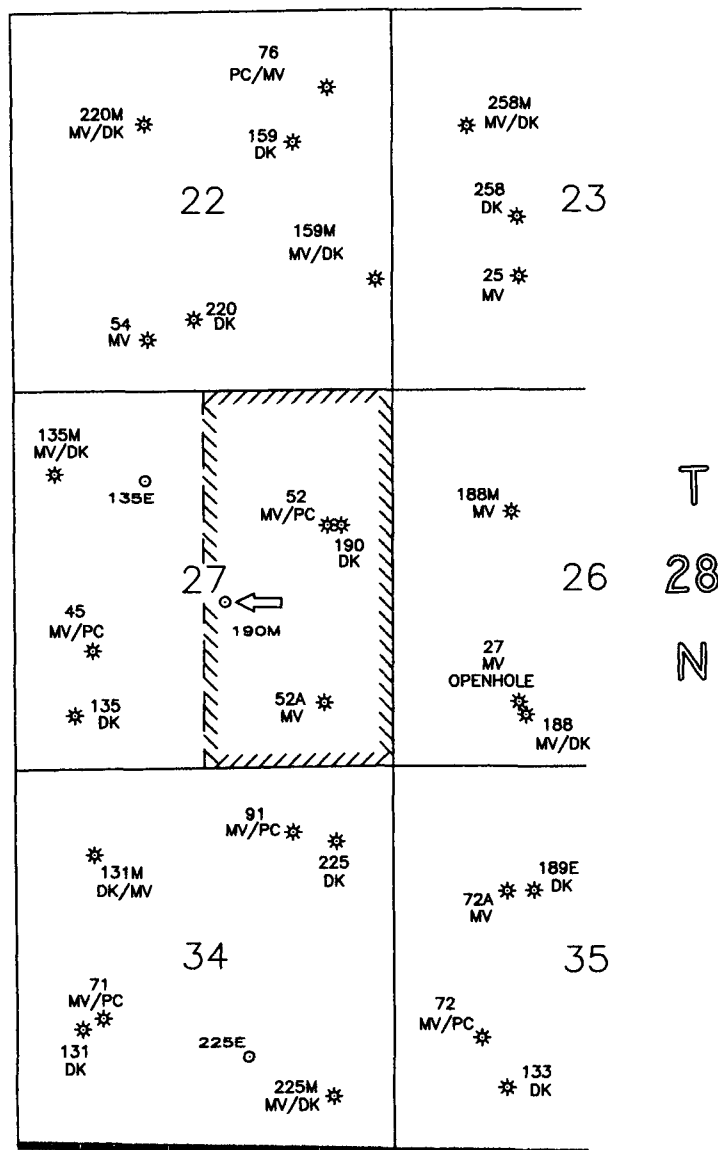

Conoco respectfully requests that a non-standard location for the Basin Dakota Pool be issued for the referenced well for the reasons cited above. If there are any questions concerning this application, please feel free to call me at (915) 686-5798.

Sincerely,

Kay Maddox
Regulatory Agent
