Gentlemen:

The original orthodox location of 1,650' FNL and 660' FEL could not be staked because it was too close to buildings so the location was moved 300' to the north. The Carlsbad 22 H State Com #2 will be drilled to approximately 11,300' to test the Morrow formation. The proposed location is unorthodox and must be granted an exception to the spacing rules. Under Rule 104.F (2) the OCD may grant administrative approval if the designated operator of any adjoining or diagonal spacing unit, to which the well will encroach, waive objection to the proposed location.

A successful response from you will eliminate the necessity to conduct a full OCD hearing on this matter and expedite our efforts. However, if you object to the location, your expression of opposition must be filed with the OCD within twenty (20) days from the date this notice was mailed.

Devon respectfully requests that you waive objection to the drilling of the Carlsbad 22 H State Com. #2 at the proposed location and evidence your acceptance by executing and returning a copy of this letter to the undersigned at the above address.

Sincerely,

Dear Ms. Graham:

In reference to your letter dated 2/9/99, this is to advise you that Hanagan Petroleum Corporation has no objections to the unorthodox location for the captioned well.

If you need anything further, please advise.

Sincerely,

HANAGAN PETROLEUM CORP.

  
Michael G. Hanagan, President
