Subject: RE: Rice Operating Company - ICP for Vacuum State K

Dear Mr. Conder:

The New Mexico Oil Conservation Division (OCD) has reviewed the submitted Investigation Characterization Plans (ICP), dated March 10, 2009, for the above-referenced site. The OCD hereby conditionally approves the following ICP for the Rice Operating Company (ROC) site:

Vacuum State K EOL submitted by Texerra on 3/17/2009 #1R0425-47

ROC must delineate the chloride concentration to 250 mg/Kg or less in soils (and 250 mg/L or less in groundwater if appropriate) at the above-referenced site.

Also, please be advised that OCD approval of this plan does not relieve the owner/operator of responsibility should operations pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the owner/operator of responsibility for compliance with any OCD, federal, state, or local laws and/or regulations.
