Subject: APD Status

Ms. Wrotenbery:

I submitted an APD for the Cecil Cast 2A, located 1577' FNL; 411' FWL of Section 19-T30N-R11W, San Juan County, NM to the OCD on 10/31/03. The Aztec District office signed off on the APD but the approval is pending non-standard location approval. I submitted a letter and attachments to you regarding such on November 4, 2003. I have received consent from all the working interest owners in the adjoining spacing unit for the non-standard location. Please advise if you need additional information to approve this APD.

Thank you and I look forward to your reply. I can be reached at carlasue4@lycos.com.

APD ATTACHMENT
CECIL CAST 2A
1715' FNL; 1100' FWL
SECTION 19-T30N-R11W
SAN JUAN COUNTY, NM**

Maralex Resources, Inc., proposes to drill a vertical well at the above-designated location to test the Basin Fruitland Coal formation. A native mud will be used to drill the surface hole and produced water from Maralex's existing Fruitland wells will be used to drill the production hole. Both sets of casing will be cemented back to surface based on fluid and/or log calipers run at total depth.

The drilling contract has not been awarded yet, thus the BOP model to be used is not yet known. A typical model is shown on the attached page. Once out from under the surface casing, a minimum of 1,000 psi BOP and choke manifold system will be used. BOP controls will be installed before drilling the surface casing plug and used until the well is completed or abandoned.
