Dear Mr. Conder:

The New Mexico Oil Conservation Division (OCD) has reviewed the submitted proposed Investigation Characterization Plan Amendment, dated September 22, 2009, for the above-referenced site. The OCD hereby conditionally approves the amendment:

ROC must submit a groundwater monitoring report, including the results from the "new" monitoring wells within 120 days.

Please be advised that OCD approval of this amendment does not relieve the owner/operator of responsibility should operations pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the owner/operator of responsibility for compliance with any OCD, federal, state, or local laws and/or regulations.

If you have questions regarding this matter, please contact me at 505-476-3489.

for the Rice Operating Company's (ROC)
BD Jct. N-32 Release Site (1R426-153)
Unit Letter N, Section 32, T21S, R37E, Lea County, New Mexico**

Dear Mr. Conder:

The New Mexico Oil Conservation Division (OCD) has received the Investigation and Characterization Plan Report for the above-referenced site, dated April 22, 2009, and has conducted a review of the report. The groundwater monitoring well installation plan within the report substantially meets the requirements of 19.15.29 NMAC. Therefore, the OCD hereby conditionally approves the installation plan as specified in the report:

ROC must submit a groundwater monitoring report for the additional wells to the OCD within 90 days.

Please be advised that OCD approval of this plan does not relieve the owner/operator of responsibility should operations pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the owner/operator of responsibility for compliance with any OCD, federal, state, or local laws and/or regulations.
