Subject: Soil Closure Request Approval (1R-2136) Plains DCP Plant to Lea Station 6-Inch #2 Release Site

**RE: Soil Closure Request Approval
for the Plains Marketing, L.P.
DCP Plant to Lea Station 6-Inch #2 Release Site (1R-2136)
Unit Letter F, Section 31, T20S, R37E, NMPM, Lea County, New Mexico**

Dear Mr. Henry:

The New Mexico Oil Conservation Division (OCD) has received Plains' Remediation Summary and Soil Closure Request for the above-referenced site (dated, October, 2009). The report, submitted in partial fulfillment of 19.15.29 NMAC (Part 29, formally, Rule 116), indicates that Plains has partially met the requirements of 19.15.29 NMAC for this site. Therefore, the OCD hereby conditionally approves the Soil Closure Request for the DCP Plant to Lea Station 6-Inch #2 Release Site and no further soil remediation is required for this site.

The DCP Plant to Lea Station 6-Inch #2 Release Site is still active under Remediation Plan, 1R-2136, and groundwater monitoring, groundwater contamination delineation (if necessary), and groundwater remediation must continue at the DCP Plant to Lea Station 6-Inch #2 Release Site.

Please be advised that OCD approval of this request does not relieve the owner/operator of responsibility should operations pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the owner/operator of responsibility for compliance with any OCD, federal, state, or local laws and/or regulations.

Thank you for your cooperation in this matter. If you have any questions regarding this matter, please contact at 505-476-3489.

Subject: Workplan approval for DCP Plant to Lea Station 6" #2 (1R-2136)

**RE: Workplan Approval
for the Plain's
DCP Plant to Lea Station 6-Inch #2 Release Site (1R-2136)
Unit Letter F, Section 31, T20S, R37E, Lea County, New Mexico**

Dear Mr. Henry:

The New Mexico Oil Conservation Division (OCD) has received the remediation summary and proposed remediation strategy and supplemental data (workplan) for the above-referenced site, dated May, 2009, and has conducted a review of the plan. The workplan substantially meets the requirements of 19.15.29 NMAC. Therefore, the OCD hereby conditionally approves the workplan:

Plains must implement the workplan within 30 days.

Plains must submit to the OCD a groundwater status report (with proposed possible further delineation and corrective actions) within 60 days.

Please be advised that OCD approval of this workplan does not relieve the owner/operator of responsibility should operations pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the owner/operator of responsibility for compliance with any OCD, federal, state, or local laws and/or regulations.

If you have any questions regarding this matter, please contact me at 505-476-3489.

Subject: Updated analytical data for DCP Plant to Lea Station 6" #2 (1R-2136)

Ed,

During our last phone discussion regarding your review of the remediation strategy report for the DCP Plant to Lea Station #2 site (1R-2136) you had requested that Plains obtain an additional bottomhole sample from the excavated area. A 5-point composite soil sample (**Comp. Floor @ 15'**) was collected from the bottomhole of the excavation on 06/24/2009 and submitted for laboratory analyses of TPH and BTEX. Attached are an updated site map, an updated analytical table, and the laboratory analytical report for the sample. Upon your review of the additional data for the site, Plains respectfully requests to proceed with the proposed remediation activities outlined in the remediation strategy report.

Hope you had a good vacation and thanks for your time.

Jason Henry
