Subject: RE: H2S Contingency Plan for DCP Midstream's H2S Contingency Plan

Hi Carl,

I've done a little research here, and here is what I have come up with. I believe that the information below is pertinent to the old Zia I Plant. That is no longer a gas processing plant but is presently a only a booster station that handles only sweet gas. According to what I know, that plant never handled sour gas. If you look at the ROE map for the Zia II H2S Contingency Plan that I just submitted to you (Figure 4) you will see that the old Zia plant is shown by a box with a bright pink border. As I explained in the cover letter that accompanied the Contingency Plan I submitted to you last week, DCP has built a completely new processing plant that will handle sour gas and has now drilled one of the two AGI wells permitted by NMOCC. The AGI well is at the new Zia II Plant not at the old Zia I Plant.

Let me know if you have additional questions.

Best regards,

Julie

Julie:

Seems like this was:

145		DCP MIDSTREAM, LP	DUKE ZIA GAS PLANT & ZIA BOOSTER STATION	Gas Plant	A	07/06/2013	Mr. Mark Bishop	Lea	DUKE ZIA GAS PLANT & ZIA BOOSTER STATION	A- 19- 19 S- 32 E	Called and Matt's answering service answered, left msg. 1/14	N (sent 7/27/20 requiri sampli worse o scenari submit determ
-----	--	-------------------------	---	--------------	---	------------	-----------------------	-----	---	----------------------------------	---	---

However, there is now an AGI Well that went to Hearing? May need to develop a new H2S order number for this review. Please clarify. Thanks.

Julie:

Good afternoon. OCD is in receipt of your e-mail msg. with attached H2S CP documents.

I will work to begin reviewing next Tuesday and proceed similar to our review, comments, and revisions procedure in the past.

Please contact me if you have questions. Thank you.

Dear Carl,

Attached is a new H2S Contingency Plan. This is a plan for a completely new Plant, as explained in the attached cover letter.

I will give you a call on Tuesday so that I can answer any questions you may have and so that we can discuss the potential timeframe for review of this plan.

Best regards,

Julie

Subject: RE: Notice of Inactivity - Zia Gas Plant GW-145

Leonard,
I have verified that no fluid or solid waste is currently stored at the DCP Zia Gas Plant. There are no tanks on site that meet the regulatory definition of a sump. The below-grade tanks on site have secondary containment and leak detection. Currently, the below-grade tanks only collect rainwater. They are inspected and pumped out monthly.

DCP will notify you when the facility is re-activated.

Please let me know if you have any additional questions.

Thank you,

Subject: RE: Notice of Inactivity - Zia Gas Plant GW-145

Diane,

Thank you for the notification.

The OCD recognizes the discontinued status of the Zia Gas Plant.

This facility is still regulated by the discharge permit therefore the OCD would like:

- Any fluid waste on site to be disposed of and not left idling. Submit a list of waste to stay on site. Condition 6. (B) requires OCD approval for waste to be on site more than 180 days.
- Sumps to be kept dry.
- Continued monthly monitoring of facilities below-grade tanks. Notify OCD if below-grade tanks are not engineered with a secondary containment with a leak detection system. If no system is place the below-grade tank shall cease operations and have all fluids removed.

If you have any questions please feel free to contact me.

Subject: Notice of Inactivity - Zia Gas Plant GW-145

Leonard,

Per the notification requirement of discharge permit condition 22 for GW-145, this is a notification that operations at the Zia Gas Plant will be discontinued for a period in excess of 6 months. The inactivity is due to current market conditions. The plant will be reactivated when market conditions allow. I will notify you when the plant is reactivated.

Thank you,

Diane Kocis
