Attn: Mr. A. L. Porter, Jr.
Secretary-Director

Re: Application for Administrative
Approval of Non-Standard Spacing
Unit in Jalmat Gas Pool, Lea
County, New Mexico

Gentlemen:

We propose to re-enter a plugged well now called the Burleson & Huff No. 1 Lanehart well situated 660 feet from the south and west lines of Section 21, T-25-S, R-37-E, N. M. P. M., Lea County, New Mexico and test the Yates formation at a depth of about 2600 feet. Such well is situated within the boundary of the Jalmat Gas Pool. We own leases covering the S/2 of SW/4 and NW/4 of SW/4 of said Section 21 down to a depth of 3000 feet, which is below the base of the Yates formation.

We hereby make application for approval by the Commission of a non-standard spacing unit in the Jalmat Gas Pool consisting of the S/2 of SW/4 and NW/4 of SW/4 of said Section 21 for our No. 1 Lanehart well and request that under Section D, Sub-Section II of Rule 104 of the Oil Conservation Commission Rules and Regulations, the Secretary-Director of the Commission grant administrative approval without notice and hearing designating such tract of land as the spacing unit for the production of gas from our said No. 1 Lanehart well.

Our request is made due to the fact that the only acreage we have under lease in said Section 21 surrounding the aforementioned No. 1 Lanehart well is the S/2 of SW/4 and NW/4 of SW/4 of said Section 21, and we wish to designate such acreage as the spacing unit for gas production.

We have mailed copies of this Application and attached plat by certified mail with return receipt requested to all of the off-setting Operators to the proposed spacing unit and all other Operators of oil and gas leases situated in Section 21, notifying them of our application. All such Operators have been requested to sign a written consent in the form of a Waiver to our proposed spacing unit. The off-setting Operators, except Burleson & Huff, the applicants herein, are as follows: Union Texas Petroleum, Tenneco Oil Company, Aztec Gas Systems, Thornton Petroleum Corporation, Humble Oil & Refining Company and Reserve Oil & Gas Company.

Page Two

December 8, 1969

The other Operators in said Section 21 are Getty Oil Company and Atlantic Richfield Company. Photocopies of receipts showing notices have been mailed are attached hereto and photocopies of the signed receipts from the Operators will be forwarded to you after they have been returned to us.

A copy of a plat on which the No. 1 Lanehart well is located and the proposed spacing unit is outlined in red is attached.

This application is submitted to you in triplicate.

Yours very truly,

BURLESON & HUFF

Mr. A. L. Porter, Jr.
Secretary-Director
New Mexico Oil Conservation Commission
P. O. Box 2088
Santa Fe, New Mexico 87501

Dear Mr. Porter:

Burleson & Huff of Midland, Texas has notified us that they propose to re-enter a well to test the Yates formation at a depth of about 2600 feet at a location in the SW/4 of SW/4 of Section 21, T-25-S, R-37-E, Lea County, New Mexico and that they have made application in the event their well is a gas well that the spacing unit therefor consist of 120 acres comprising the S/2 of SW/4 and NW/4 of SW/4 of Section 21 as a non-standard spacing unit.

This will certify that Getty Oil Company, as an Operator in the said Section 21, hereby waives its right to object and has no objection to the proposed spacing unit in the event the Burleson & Huff No. 1 Lanehart well is a gas well in the Yates formation.

Yours very truly,

GETTY OIL COMPANY
