WATER @ 57'

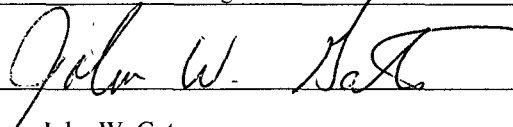

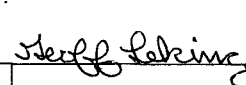

Describe Cause of Problem and Remedial Action Taken.*

The cause of the spill was due to a flowline leak due to internal/external corrosion. The failed section of flowline will be replaced.

Describe Area Affected and Cleanup Action Taken.*

60' x 36' and 30' x 36' area of dry pasture land with no cows present. The spill was delineated and remediated according to a NMOCD-approved plan by Geoff Leking that included excavation and liner installation. All excavated soil was disposed of at an NMOCD-approved disposal facility. Confirmation samples were collected and submitted to the NMOCD with this form.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
