Re: Application for Retroactive Approval of an
80-Acre Non-Standard Oil Proration Unit
E/2 SE/4 of Section 10, Township 22 South, Range 37 East, NMPM,
South Eunice-San Andres Pool
A B Baker Wells No. 8 & 11
Lea County, New Mexico

Dear Mr. Fesmire:

Apache Corporation ("Apache") respectfully requests approval of an 80-acre non-standard oil spacing and proration unit in the South Eunice-San Andres Pool comprising the E/2 SE/4 of Section 10, Township 22 South, Range 37 East, NMPM, Lea County, New Mexico. **Apache further requests that approval of this non-standard unit be made retroactive to the date of completion (10/31/2000) of its A B Baker No. 8 (API No. 30-025-35135) located at a standard location 1881 feet from the South line and 869 feet from the East line (Unit I) of Section 10.** Apache will also dedicate its proposed A B Baker No. 11, to be drilled at a standard location 470 feet from the South line and 990 feet from the East line (Unit P) of Section 10, to the proposed non-standard unit.

The South Eunice-San Andres Pool is currently governed by special pool rules established by Division Orders No. R-3706, as amended, and R-12748-A. These rules require standard 80-acre spacing and proration units that comprise either the N/2 or S/2 of a governmental quarter-section with wells to be located no closer than 330 feet to a quarter-quarter section line. These rules also provide that up to two wells may be drilled on each quarter-quarter section within the proration unit. The requirement that the spacing units be oriented as "lay down" units is not typical for most oil pools spaced on 80 acres. Typically, oil pools of this nature allow units to be oriented as N/2, S/2, E/2 or W/2 of a governmental quarter section.

The A B Baker No. 8 was drilled by Apache in October, 2000 and completed in the South Eunice-San Andres Pool on October 31, 2000. The Form C-101 ("Application to Drill" or "APD") and corresponding Form C-102 ("Acreage Dedication Plat") for the A B Baker No. 8 shows that on August 11, 2000 Apache requested Division approval of a "stand up" 80-acre unit comprising the E/2 SE/4 of Section 10. The Hobbs District Office of the Division subsequently approved Apache's APD for the A B Baker No. 8. A search

of Division records indicates that Apache inadvertently failed to obtain Division approval of the subject 80-acre non-standard oil proration unit at that time.

A further search of Division records shows that at the time Apache filed its APD for the drilling of the A B Baker No. 8, there was an existing 80-acre non-standard oil proration unit comprising the W/2 SE/4 of Section 10. This unit was approved by Division Order No. NSP-1768 dated January 28, 1997, and is currently dedicated to the Chevron USA, Inc. Baker "B" Wells No. 4 and 10. Consequently, Apache was precluded at that time from forming a standard 80-acre spacing and proration unit for the A B Baker No. 8.

Attached is a C-102 plat showing the proposed non-standard unit, the existing A B Baker No. 8 and the proposed A B Baker No. 11.

Attachment "A" is a plat that identifies all operators of affected offset tracts. All operators shown on Attachment "A" and listed on Attachment "B" have been provided notice of this application by Certified Mail. Proof of notice is attached.

In summary, approval of the subject application will provide Apache the opportunity to fully develop the E/2 SE/4 of Section 10 in the South Eunice-San Andres Pool, thereby preventing waste, and by virtue of the existence of an 80-acre non-standard unit comprising the W/2 SE/4 of Section 10, will not violate correlative rights.

If you should have any questions, please call me at (505) 690-9453 or E-Mail me at drcatanach@netscape.com.

Re: Apache Corporation
80-Acre Non-Standard Oil Proration Unit
E/2 SE/4 of Section 10, T-22 South, R-37 East, NMPM
A B Baker Wells No. 8 & 11
Lea County, New Mexico

Ladies and Gentlemen:

Enclosed please find a copy of the application filed by Apache Corporation ("Apache") for the retroactive approval of an 80-acre non-standard oil spacing and proration unit in the South Eunice-San Andres Pool comprising the E/2 SE/4 of Section 10, Township 22 South, Range 37 East, NMPM, Lea County, New Mexico. The special pool rules for the South Eunice-San Andres Pool currently require lay-down 80 proration units. Apache was precluded from forming a standard 80-acre unit by the existence of an 80-acre non-standard oil proration unit comprising the W/2 SE/4 of Section 10.

The existing 80-acre non-standard unit is currently dedicated to the Apache A B Baker Well No. 8 (API No. 30-025-35135) located 1881 feet from the South line and 869 feet from the East line (Unit I) of Section 10. This well was completed in the South Eunice-San Andres Pool on October 31, 2000. Apache will also dedicate to this unit its proposed A B Baker No. 11 which is to be drilled at a standard location 470 feet from the South line and 990 feet from the East line (Unit P) of Section 10.

As the operator of an offsetting tract that may be affected by the proposed 80-acre non-standard oil proration unit, you are being provided notice as per Division rules and regulations. Objections must be filed in writing at the Division's Santa Fe office within 20 days from the date this notice was sent to you. If no objection is received within 20 days from the date this notice was sent to you, the application may be approved.

If you should have any questions, please call me at (505) 690-9453.

Sincerely,

David Catanach

David,

I appreciate your quick response.

If you do list the dedicated wells in the NSP order, would you please include all three wells.

Here is the A B Baker No. 7 well information.

API No. 30-025-35134 727' FSL & 827' FEL (Unit P), Section 10, T-22S, R-37E

Dear David

I do not think there is any need to re-notice this application since, as you point out, Order R-1248-A express permits two wells per quarter-quarter section in this pool.

Sincerely

David K. Brooks

Subject: Apache NSP Application

David,

On Friday, December 11th, 2009, I filed an NSP application for Apache Corporation for its existing A B Baker No. 8, located in Unit I of Section 10, T-22 South, R-37 East,, and for its proposed A B Baker No. 11, to be drilled in Unit P of Section 10. These wells are in the South Eunice-San Andres (Oil) Pool. This pool is governed by R-3706 and R-12748-A. The rules specify 80-acre units, 330' foot setbacks and allow 2 wells per quarter-quarter section, for a total of four wells per standard unit. Subsequent to the filing of the application, I discovered, while filing the drilling permit for the A B Baker No. 11, that Apache's existing A B Baker No. 7 (API No. 30-025-35134) located in Unit P of Section 10, was also completed in the South Eunice-San Andres Pool and was also dedicated to this 80-acre unit. I did not mention this well in the NSP application. I don't think this additional well has a bearing on the application since the pool rules allow for 4 wells per unit, and all three wells are located at standard locations, however, if you want me to send a corrected notice letter to the offset operators, or otherwise amend the application, please let me know.

Thanks,

David Catanach

Re: Proposed 80 acre non-standard
oil proration unit
E/2 SE/4 Sec. 10, T-22-S, R-37-E
Lea County, New Mexico

Mr. David Catanach
Apache Corporation
6120 S. Yale, Suite 1500
Tulsa, Oklahoma 74135

Dear Mr. Catanach:

ICA Energy Operating, LLC is in receipt of your December 11, 2009, correspondence wherein you have proposed an application filed by Apache Corporation ("Apache") for the retroactive approval of an 80 acre non-standard spacing unit in the S. Eunice San Andres-San Andres Pool on the above captioned lands.

ICA has reviewed your proposed A B Baker #11 which is to be drilled at a location 470' FSL and 990' FEL of Section 10, T22S, R37E and as it pertains to **that location** ICA, at this time, raises no objection to your application as stated in your December 11, 2009, notification correspondence.

Please be advised that ICA's lease is the east line of said Section and any deviation from the descriptive reference of location stated as 470' FSL and 990' FEL of Section 10 will not be approved accordingly.

Inasmuch as you have asked for our response please consider this notice to you as our waiver of any objection to the stipulated descriptive reference and any deviation therefrom will therefore not be considered a grant of any kind by ICA with respect to its rights to protest.

Should there be any further information needed from ICA please contact the undersigned accordingly.

Sincerely,

Curtis N. Leonard
Counsel/Land Manager

Subject: AB Baker wells 7, 8 and 11, Eddy County, NM; NSP application
Attachments: Apache AB Baker #7,8,11.doc

Dear David

Your NSP application for the referenced wells was granted under date of Jan. 7, 2010 by Order NSP-1938.

The signed original order will be posted on OCD's website.

Sincerely
David K. Brooks
Legal Examiner
