The Monument 36 State #1 is currently being plugged back to the Drinkard interval from the Abo formation. The Abo was abandoned in on 8/20/09 with a CIBP set at ~~7198~~. We perforated the Drinkard from 7210'-7263'. We are in the process of recompleting and testing this well. Since this is a three well lease of which the other two (Monument 36 State #2 and #3) are completed in the Abo interval, and since this is a small lease, we would like to upon completion of the Drinkard is to produce the Monument 36 State #1 through a three phase separator measuring the oil, water, and gas daily. The fluid would then be dumped into the Abo battery and then sold with the existing Abo oil. The gas would be sent from the separator to the existing Abo meter run. The gas will be metered daily through electronic flow meter.

Dear Ms. Ward:

We are in receipt of your letter of December 22, 2009. Your letter requests our approval to surface commingle the Monument 36 State #1 (30-025-34560) Drinkard production with the existing Abo production currently being produced from the Monument 36 State Well Nos. 2 (30-025-34561) and 3 (30-025-34533).

Since it appears that all the New Mexico Oil Conservation Division's rules and regulations have been complied with, and there will be no loss of revenue to the State of New Mexico as a result of your proposed operation, your request is hereby approved. Our approval is subject to like approval by the New Mexico Oil Conservation Division.

Please submit a \$30.00 dollar filing fee.

If you have any questions or if we may be of further help, please contact Pete Martinez at (505) 827-5791.

Very truly yours,

PATRICK H. LYONS
