Dear Ms. Corley:

Reference is made to your recent application for an exception to Rule 303.A. of the Division Rules and Regulations to permit the above-described well to commingle production from the subject pools in the wellbore.

It appearing that the subject well qualifies for approval for such exception pursuant to the provisions of Rule 303.C., and that reservoir damage or waste will not result from such downhole commingling, and correlative rights will not be violated thereby, you are hereby authorized to commingle the production as described above and any Division Order which authorized the dual completion and required separation of the zones is hereby placed in abeyance.

In accordance with the provisions of Rule 303.C.(1), the maximum amount of gas that may be produced from the well shall be determined by Division Rules and Regulations.

Assignment of allowable to the well and allocation of production from the well shall be on the following basis unless modified with permission of the Aztec District Office and copied to this office. Future Pictured Cliffs and Mesaverde production shall be calculated from current production levels declined at exponential rates, as shown on the tables attached to the application. The remaining gas produced from the well shall be attributed to the Chacra. Condensate shall be allocated 100 percent to the Blanco-Mesaverde Prorated Gas Pool.

REMARKS: The operator shall notify the Aztec District Office of the Division upon implementation of commingling operations.

Pursuant to Rule 303.C.(2), the commingling authority granted herein may be rescinded by the Division Director if conservation is not being best served by such commingling.
