Subject: RE: Linn Operating - C A Russell Battery (2RP-392)

Logan,

As discussed, it is my understanding that approximately 3" of material has been removed from the release area and stockpiled on location. In reviewing the photos taken of the release, I would assume that this material would be highly saturated. Please keep this material segregated from any other material removed for now.

Subject: Linn Operating - C A Russell Battery (2RP-392)

Mike,

As per our conversation on 3-1-10 @ 2:15pm Central Time, we will complete the delineation of the impacted soil on 3-2-10. Once the delineation is complete a revised remediation plan will be submitted for approval.

Thanks,
Logan Anderson
