NATURE OF RELEASE

Type of Release : Liquid	Volume of Release: >10 bbls	Volume Recovered: none
Source of Release: Pipeline	Date & Hour of Occurrence: approx 3/23/2010	Date & Hour of Discovery: Same
Was Immediate Notice Given OCD? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom @ OCD? NA	
By Whom?	Date and Hour:	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse. NA	
If a Watercourse was Impacted, Describe Fully.* NA		
Describe Cause of Problem and Remedial Action Taken. (If water spilled, give Chloride content)* Unknown at this time.		
Describe Area Affected, Dimensions, and Cleanup Action Taken.* Area of contamination was approximately six to eight (6-8) feet wide and one hundred (100) feet long west of a pipeline vent. Initially, some scraping of the area was conducted to remove wet soil. Due to extreme geological conditions (caliche rock) the remainder of the contamination will be removed by backhoe or other mechanical means deemed appropriate to remediate site to the State of New Mexico requirements.		

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
