CASING TEST AND CEMENT JOB ☐
OTHER: ☐

12. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103. (For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion)

(1) Division Order establishing pre-approved pool area: R-11363; (2) Pools to be commingled: Blinebry Oil and Gas (06660) & Wantz; Abo (62700); (3) Existing perfs 5403-5788', additional proposed perfs 6624-6912'; (3) NM S State 32, 33 and J.L. Greenwood 12 are active in Blinebry Oil. We have historical production trends & will use the "subtraction method" to allocate production. The J. L. Greenwood 10 is currently SI and has been SI since Dec 1998. The well went down with a tbg failure and it was uneconomic to return to production. We will use the "fix allocation" method on this well and assume that all of the production is coming from the Abo; (4) Plans are to set the rod pump below the Abo and maintain a minimal production bottomhole pressure on the well. This will prevent downhole crossflow. A production profile will be run as needed to ensure that no crossflow is occurring; (5) Interest ownership is not different between the pools; (6) copy of this sundry notice is being sent to State Land Office.

(EXXON Mobil is 100% interest owner.)
