NM Oil Conservation Division

June 30, 2010

David Brooks

1220 South St. Francis Drive

Santa Fe, NM 87505

Dear Mr. Brooks:

Benson-Montin-Greer Drilling Corp. (BMG) requests the State of New Mexico Oil Conservation Division's approval to drill the Canada Ojitos Unit (COU) # 47 in the following unorthodox location: 574' FSL and 1809' FWL, Unit N, Sec 4, T25N, R1W Rio Arriba County New Mexico. This well is intended to be drilled and completed in the Mancos formation.

The well will be drilled in the Canada Ojitos Unit; all adjacent sections to section 4 are within the Canada Ojitos Unit. The Mancos interest owners have the same interest throughout the unit.

The location of this well was selected to maximize the benefit of naturally fractured reservoir characteristics as derived from seismic data. The location selection is further affected by topography and by the need to minimize surface disturbance within the Santa Fe National Forest.

The nearest producing well (BMG's COU # 10, a Mancos producer) is approximately 4600 ft north/northeast of the proposed COU # 47 site.

We are submitting the following:

1. A copy of the NM OCD form C-102
2. Nine-section map of the surrounding area with location of the other producing Mancos wells.

RECEIVED OCD  
2010 JUL -2 P 21

This application is filed in accordance with NMAC 19.15.15. This application also references the NMOCD "Special Rules for the West Puerto Chiquito-Mancos Oil Pool" Order No. R-6469-B. Of special consideration is Rule 5 as it applies to the application for unorthodox location as necessitated by topographical conditions.

We respectfully request your approval on this application.

Sincerely,

A handwritten signature in black ink, appearing to read "Loren Diede", with a large, stylized flourish at the end.
