OIL CONSERVATION
SANTA FE
MAR 21 1955

Mr. W. B. Macey
Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Dear Mr. Macey:

Under order by the Oil Conservation Commission we herewith submit our application for your consideration of immediate administrative approval. This request is made in accordance with the following commission rules and regulations, to-wit: Rule 1 of Order R-128-C and Rule 6 of Order R-565 and R-566 of the Special Rules and Regulations for the various North-west Gas Pools.

Following is a legal description of the acreage involved:

Northeast quarter of the Northeast quarter Section 1,
Township 29 N., Range 13 W. (New Mexico Petroleum Map).

The name and location of the well involved is Hutchison Well Number One, which lies in the Northeast portion of the above described location.

We are herewith enclosing plats showing the acreage to be dedicated and the location of the well, in which there is no offset ownership.

Since there are no other wells within the prescribed number of feet as set forth in your regulations, no mailing list of operators in the nearby area can be included.

Sincerely yours,

David McNeill

Mr. John J. Dempsey, MC
Congress of the United States
House of Representatives
Washington, D. C.

Dear Mr. Dempsey:

Reference is made to your letter of February 9, 1955, in which you requested this office to furnish you with information concerning the necessary steps for the formation of a non-standard gas proration unit for your Hutchison Well No. 1 in San Juan, New Mexico.

One of the basic requirements for the formation of a non-standard gas proration unit is that all of the acreage to be dedicated to such a unit must be contiguous. It has been, and is, the policy of the Commission not to consider acreage which meets at only one point as being contiguous. This therefore would apply to the acreage which you propose to dedicate to your Hutchison Well No. 1. This Commission will be able to grant only a 40-acre non-standard gas proration unit to your Hutchison Well No. 1. The reduction in unit size from 40 acres to 80 acres will in no way effect your allowable, inasmuch as the marginal nature of this well gives to it the breaking point allowable as computed from our deliverability curves. This in all cases would give an allowable to your well in excess of its ability to produce.

For your information I am enclosing a copy of the applicable order and a copy of memorandum which outlines the filing requirements for a non-standard gas proration unit which will generally apply to the Northwest.

By copy of this letter we are contacting your Santa Fe office with whom we will carry on all future correspondence.

If we can be of any further assistance to you regarding this matter do not hesitate to call upon us.

Very truly yours,

Charles M. Rieder
Petroleum Engineer

Mr. W. B. Macy, State Geologist
Oil Conservation Commission
State Capitol
Santa Fe, N. M.

Ref. Hutchison Well No. 1
San Juan County

Dear Mr. Macy;

I have just received a letter from your Mr. Arnold at Aztec in which he advises that I must request permission from your office before I can comply with the proration program.

Mr. Arnold states in his letter the following.

"All necessary information has been filed in order for your well to be placed on the first proration schedule, which is to begin March 1, 1955. It will, however, be necessary for you to secure administrative approval for your well as it is on a non-standard proration unit. Oil conservation rules specify that a Pictured Cliffs well have 160 acres in the form of a square being in a regular $\frac{1}{4}$ section dedicated as the drilling unit. Your plat indicates that your acreage, although being in a single $\frac{1}{4}$ section, consists of only 80 acres. ---"

At the time this well was drilled, it is my understanding that only 80 acres were required for a drilling unit. Therefore I request that you take the necessary steps to have this unit included, if necessary, in a proration unit.

Please advise my Santa Fe office if you need any other information.

Truly yours
John J. Dempsey, MC.
