Re: Oswell-Federal #1-4
W/2 Sec. 4, T-29-N, R-11-W
Basin Dakota Gas Pool
San Juan County, New Mexico

Dear Mr. Porter:

We are planning to commence the drilling of the above-captioned well to the Dakota formation in the near future. The pro-ration unit assigned to this well will be the W/2 of Section 4-29N-11W. The W/2 of this section contains only 306.55 acres of land according to the general land office survey and is therefore a non-standard gas unit.

We respectfully request approval of this application for a non-standard gas unit in the Dakota producing zone without notice and hearing under Rule 1 (B) of the Special Rules and Regulations of the Basin Dakota Gas Pool as set forth in Order R-1287. The W/2 of this section is being communitized as to the Dakota formation for this well and Western Development Company of Delaware is the owner of all the working interest within the proposed non-standard unit.

We are furnishing the offset operator with copies of this application.

Yours very truly,

W B Macey
W. B. Macey
President
