NATURE OF RELEASE

Type of Release	Produced Water	Volume of Release	120 bbls	Volume Recovered	10 bbls
Source of Release	Lightning Strike	Date and Hour of Occurrence	evening CDT, 09/15/2010	Date and Hour of Discovery	8 am CDT, 9/16/2010
Was Immediate Notice Given?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?	Geoffrey Leking, Hobbs		
By Whom?	Clay Tipton, Field Supervisor	Date and Hour	8:30 am CDT 9/16/2010		
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.\*

N/A

Describe Cause of Problem and Remedial Action Taken.\* A field employee of another company passed by our location and saw damage to the water tank. He immediately called our contract pumper, Refugio Porras, who was making his rounds but had not arrived at this location yet. Our pumper immediately called his Field Supervisor, Clay Tipton, and headed for the location. Clay called BTA's office and the OCD, Hobbs, Geoffrey Leking, NMOCD Investigator, and also headed for the location. Upon arriving at the location, the pumper found that lightning had struck the 500 bbl metal water tank and blown the top and sides off of the tank base. The top of the tank was approximately 100 ft from the tank pad. The contents of the tank had released onto the location. All product remained on the location site. A vacuum truck was dispatched to recover all produced water possible. BTA's Environmental Coordinator will assess the site and determine any further remediation activities. The destroyed tank will be removed from the site and replaced with another.

Describe Area Affected and Cleanup Action Taken.\*

See above explanation

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
