Dear Sir:

In re Nonstandard Proration Unit for
Jicarilla Tribal 72 Well No. 1
Wildcat Field, Rio Arriba County, New Mexico

Pan American Petroleum Corporation has made application to the New Mexico Oil Conservation Commission, pursuant to Rule 104, Section M, for a 58.3-acre nonstandard proration unit for its proposed Jicarilla Tribal 72 No. 1 well to be drilled in the southwestern portion of Section 6, Township 23 North, Range 3 West, Rio Arriba County, New Mexico. The proposed nonstandard unit will consist of the SW/4 SE/4, Section 6, and a lot 604' wide by 1320' long in the SE/4 SW/4, Section 6.

Southern Union Production Company is an offset operator, holding an interest in Section 12, Township 23 North, Range 4 West. Southern Union Production Company has no objection to the pooling of the two above-described tracts and the drilling of this well in the southwestern portion of Section 6, Township 23 North, Range 3 West, Rio Arriba County, New Mexico.

Very truly yours,

SOUTHERN UNION PRODUCTION COMPANY

Subject: Nonstandard Proration Unit for
Jicarilla Tribal 72 Well No. 1
Wildcat Field
Rio Arriba County, New Mexico

Mr. A. L. Porter, Jr. (3)
New Mexico Oil Conservation Commission
P. O. Box 2088
Santa Fe, New Mexico

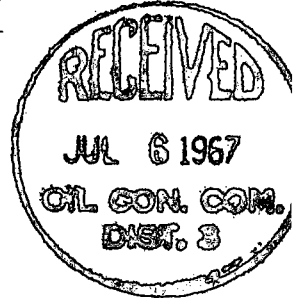

Dear Sir:

Pan American Petroleum Corporation hereby makes application, pursuant to Rule 104, Section M, for a 58.3-acre nonstandard proration unit for its proposed Jicarilla Tribal 72 No. 1 well to be drilled in the southwestern portion of Section 6, T-23-N, R-3-W, Rio Arriba County, New Mexico. The proposed nonstandard unit will consist of the SW/4 SE/4 Section 6, and a lot 604' wide by 1320' long in the SE/4 SW/4 Section 6. A certified plat of the acreage involved is attached. This plat shows that Pan American Petroleum Corporation is the lessee of Sections 6 and 7, T-23-N, R-3-W, and Section 1, T-23-N, R-4-W, and that Section 12, T-23-N, R-4-W, is jointly owned by Pan American and Southern Union Production Company.

Southern Union is contributing an undivided half of their one-half interest in this lease to Pan American in return for the drilling of the well in Section 6, and has been requested to furnish you a waiver for this nonstandard unit.

The western tier of Sections in T-23-N, R-3-W, are less than standard width, and in the case of Section 6 the W/2 of this section is a strip only 604' wide. On account of terrain and geologic conditions, it is desirable to drill the well as far to the west in Section 6 as is possible pursuant to Rule 104. Inasmuch as there is no standard location in the lot containing approximately 18.3 acres, it is desired to pool this lot with the 40-acre tract being the SW/4 SE/4 in Section 6 to form an approximate 58.3-acre nonstandard proration unit. The proposed Jicarilla Tribal 72 Well No. 1 is to be a basement wildcat well with a projected total depth in excess of 13,000'.

In connection with this application, Pan American hereby states (1) the unnumbered lot and the SW/4 SE/4 Section 6 are contiguous; (2) they are part of the same basic lease and carry the same royalty interest; and (3) the ownership of the units involved is common.

967 JUL 13 AM 8 12

In light of the above, Pan American respectfully requests administrative approval of this nonstandard proration unit pursuant to Rule 104, Section M.

Yours very truly,

PAN AMERICAN PETROLEUM CORPORATION
