NATURE OF RELEASE

Type of Release OIL	Volume of Release 8	Volume Recovered 0
Source of Release Broken Flowline	Date and Hour of Occurrence 9/18/2010	Date and Hour of Discovery 9/18/2010 - PM
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Mike Bratcher - NMOCD/Artesia	
By Whom? Amanda Trujillo - Yates Petroleum Corporation	Date and Hour 09/29/2010 pm	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse. N/A	

If a Watercourse was Impacted, Describe Fully.*

N/A

Describe Cause of Problem and Remedial Action Taken.*

Flowline ruptured in the pasture. The well was shut in and crews were dispatched to excavate contaminated material and make necessary repairs and remedial steps.

Describe Area Affected and Cleanup Action Taken *

An approximate size of 50' x 50' was impacted. The impacted area is located in the pasture northwest of well. Soil from the pooling areas was excavated and disposed of at an NMOCD approved facility. Vertical and horizontal delineation samples will taken and analysis ran for TPH and BTEX once all contaminated material has been removed. Chlorides analysis upon request. Depth to Ground Water: >100' (approx. 305', per New Mexico State Engineers Office); Wellhead Protection Area: No; Distance to Surface Water Body: >1000'; SITE RANKING IS 0. Based on site ground water quality and enclosed analytical results.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Amanda & LeeRoy,

You have probably already heard that we have had another leak on the pipeline for the Mobile CI # 8. I don't know how long it had been leaking but the ground is saturated & the vegetation is already dying. (picture attached) This is the second leak in the last few months on this pipeline & the third one in about a year or so. This is also the area that has had multiple leaks that have not been cleaned up & the contamination still needs to be addressed.

Please call me when you visit the site. I would like for you to address all of the contaminated areas in the pasture from the pipelines going to the Mobil CI Battery B. These were on the list Lisa asked me to send to you in April & I have not received a response as of yet. We need to move forward & address these issues, other lists of issues are still pending.

Thank You,

Cheryl
