Subject: RE: COG - RJU Injection Line - Work Plan

Ladies and Gentlemen,

The remediation proposal for COG's RJU injection Trunk line (RJ Ut 124) release is approved with the following conditions/stipulations:

- Notify OCD 48 hours prior to commencement of remedial operations.
- Notify OCD 48 hours prior to obtaining any samples where the analyses are to be submitted to OCD.
- In the event the liner option is deemed necessary, contact OCD.
- Submit a form C-141 marked Final Report, along with a closure report, upon satisfactory completion of project.
- Like approval by BLM as may be applicable.

This approval does not relieve COG of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, this approval does not relieve COG of responsibility for compliance with any other Federal, State, local laws and/or regulations.

If you have any questions or concerns, please contact me.

Mike Bratcher

Mike and Terry,

Please find enclosed the Work Plan for the RJU injection Line located in Eddy County, New Mexico. On September 1, 2010, Tetra Tech met with Mike Bratcher to discuss the data and proposed excavation depths. Once approved, Tetra Tech will schedule the remediation. Please call me if you have any questions concerning the work plan, thanks

Ike Tavarez, PG Senior Project Manager
