Mike and Terry,

Tetra Tech will start the site remediation on the above listed sites. Based on the assessment, the sites showed a shallow impact to the soils and most of the impacted areas were all on the pad. Tetra Tech will excavated these areas and hauled to proper disposal. Once completed, a closure report will be submitted for review. We have scheduled and notified you on the the remediation on the Jenkins B #7 flow line for Monday (9-27-10) and we estimate the remediation will take 1-2 days to complete. Once completed, the Beech Federal #2 TB remediation will start. The remaining projects will follow as listed above. We will notify or call the BLM to give Terry status reports and an opportunity to witness the remediation activities, which include startup date, excavation, confirmation sampling or liner installation, etc. as the projects are moving forward. Please call me if you have any questions, thanks
