If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

The natural gas water pump did not start, causing the water tank to overflow. Had mechanic check pump. Removed valve handle on supply gas valve to prevent accidental adjustment.

Describe Area Affected and Cleanup Action Taken.*

Initially 20bbls was released from the water tank and we were able to recover all 20bbls with a vacuum truck. All fluid was contained inside the facility firewall which is lined with 40 mil plastic. Any contaminated gravel has been removed and clean gravel has been added as necessary. We will follow up with a C-141 Final Report.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
