NATURE OF RELEASE

Type of Release	Produced water	Volume of Release	50bbls	Volume Recovered	0bbls
Source of Release	2" high pressure hose on water pump	Date and Hour of Occurrence	08/30/2010	Date and Hour of Discovery	08/30/2010 12:30 p.m.
Was Immediate Notice Given?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?	Mike Bratcher—OCD		
By Whom?	Josh Russo	Date and Hour	08/30/2010 4:49 p.m.		
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

The 2" high pressure hose on the discharge of the water pump failed causing the release. The defective hose has been replaced with a plastic coated steel line. The pump is back into working order.

Describe Area Affected and Cleanup Action Taken.*

Initially 50bbls of produced water was released from the discharge hose of the water pump and we were unable to recover any fluid from the spill. The fluid flowed north across the location to a nearby lease road, then west for 30 yards. The fluid then ran 100 yards north down a pipeline ROW, the width of the path the fluid traveled stayed under 3' wide. (The closest well location to the release is the Red Lake Sand Unit #38 injection well, Unit D, Sec.29-T17S-R28E, 330' FNL 330' FWL, 32.81138 - 104.20546, API# 30-015-33100). Tetra Tech will sample the spill site area to delineate any possible contamination from the release and we will present a remediation work plan to the NMOCD for approval prior to any significant remediation work.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
