The leak was caused by a due to a failure of a newly installed fiber/poly trunk line. The entire line was removed and replaced.

Describe Area Affected and Cleanup Action Taken.\* Of the 190 bbls or produced water released, approximately 130 bbls were recovered with a vacuum truck. Tetra Tech sampled and delineated the site. Upon completion of the delineation, the site was excavated to a maximum depth of 10 feet bgs and backfilled with clean soils.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
