Describe Area Affected and Cleanup Action Taken.\*

The affected area was the location south of the wellhead, the release flowed in a narrow flow path and pooled south of the well. The pooling area was measured to be sixty (60') feet long by forty-nine (49') feet wide. The saturated soil from the release was excavated utilizing a backhoe and then placed on a liner. Talon/LPE has been contracted for the construction of a work plan for the correction of the release.

**NMOCD ARTESIA**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
