Re: Unorthodox Well Location
Grizzell No. 18
API No. (N/A)
467' FSL & 1308' FEL, Unit P
Section 8, T-22 South, R-37 East, NMPM,
Lea County, New Mexico

Dear Mr. Sanchez:

Pursuant to Division Rule 19.15.15.13, Apache Corporation ("Apache") respectfully requests administrative approval of an unorthodox oil well location for its proposed Grizzell No. 18. This well will be drilled as a development oil well in the Blinebry Oil & Gas Pool (Oil-6660), Tubb Oil & Gas Pool (Oil-60240) and Drinkard Pool (Oil-19190).

In the Blinebry Oil & Gas Pool and the Drinkard Pool, the Grizzell No. 18 will be dedicated to an existing 40-acre oil spacing and proration unit comprising the SE/4 SE/4 of Section 8. This unit is currently dedicated in the Blinebry Oil & Gas and Drinkard Pools to the Apache Corporation Grizzell Well No. 8 (API No. 30-025-10116) located at a standard well location 990 feet from the South line and 330 feet from the East line of Section 8.

In the Tubb Oil & Gas Pool the well will be dedicated to a standard 40-acre oil spacing and proration unit comprising the SE/4 SE/4 of Section 8

The Blinebry and Tubb Oil & Gas Pools are currently governed by the General Rules and Regulations for the Prorated Gas Pools of New Mexico/Special Rules and Regulations for the Blinebry and Tubb Oil & Gas Pools as established by Order No. R-8170, as amended. These rules require standard 160-acre gas spacing and proration units and 40-acre oil spacing and proration units. The setback requirement for oil wells and gas wells to which no more than 40 acres is dedicated is 330 feet to the outer boundary of the spacing unit.

The Drinkard Pool is subject to Division Rule 19.19.15.9.

The Grizzell No. 18 is being drilled at a 20-acre infill location in order to recover remaining oil and gas reserves underlying the S/2 SE/4 of Section 8. Although the SW/4 SE/4 of Section 8 has not yet been developed in the Blinebry and Tubb Oil & Gas and Drinkard Pools, Apache anticipates drilling a well on that tract in the near future.

Due to drainage considerations, a well at the proposed location should recover additional oil and gas reserves from the target reservoirs that will otherwise not be drained by the existing well(s), thereby preventing waste.

In support of the application, the following tables show drainage areas, estimated ultimate oil and gas recoveries, cumulative oil and gas production (as of 10/2010) and current daily oil and gas producing rates for the Grizzell No. 8 and for additional offset wells located in Unit I of Section 8. **(Note: drainage areas were calculated from SophiH taken off contoured isopach maps or from log calculations.)**

Operator	Well Name	Unit	Reservoir	SophiH (Ft)	Area (Acres)	EUR (MBO)	EUR (MMCFG)
Apache	Grizzell 6 & 17	I	Blinebry/Tubb/Drinkard	6	37	148	4,489
Apache	Grizzell No. 8	P	Blinebry/Drinkard	6.5	58.7	254	3,166

Operator	Well Name	Unit	Reservoir	Cum Oil (MBO)	Cum Gas (MMCFG)	Daily Oil (Bbls)	Daily Gas (MCFG)
Apache	*Grizzell No. 6	I	Blinebry/Tubb/Drinkard	5.4	284.13	2.0	2.03
Apache	Grizzell No. 8	P	Blinebry/Drinkard	36.23	742.25	4.2	56
Apache	Grizzell No. 17	I	Blinebry/Tubb/Drinkard	9.5	104.3	2.7	149

(*Cumulative production figures for the Grizzell No. 6 include Blinebry, Tubb and Drinkard intervals. Daily current production is from the Tubb only.)

Utilizing the average offset drainage areas and SophiH and applying it to the proposed location for the Grizzell No. 18 results in an estimated recovery of 40 MBO and 4,000 MMCF of gas from the Blinebry, Tubb and Drinkard reservoirs.

The affected offset acreage in the Blinebry and Tubb Oil & Gas Pools and the Drinkard Pool is the SW/4 SE/4 of Section 8. This affected offset acreage is operated by Apache and is contained within the commonly-owned Grizzell lease. Consequently, notice of this application is not required.

In summary, approval of the application will provide Apache Corporation the opportunity to recover additional oil and gas reserves from the Blinebry, Tubb and Drinkard formations underlying the SE/4 SE/4 of Section 8 that may otherwise not be recovered by the existing producing well, thereby preventing waste, and will not violate correlative rights.
