If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

The transfer pump malfunctioned at the battery and the high level alarm was never set off. The transfer pump has been fixed and returned to service, the alarm system has been repaired.

Describe Area Affected and Cleanup Action Taken.\*

Initially 70bbbls of produced water was released from the water tank and we were able to recover 68bbbls with a vacuum truck. The entire release was contained inside the berm walls of the facility. The spill area measured 5' x 140' within the facility. Tetra Tech will sample the spill site area to delineate any possible contamination from the release and we will present a remediation work plan to the NMOCD for approval prior to any significant remediation work.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
