Airport 35-1 Spill

Mike Bratcher
NMOCD
Artesia, NM

On April 4, 2010 Oxy reported a release of Crude Oil and Produced Water in the amount of 45 barrels. Of these 45 barrels 30 barrels were recovered. Talon LPE was dispatched to delineate this site at the time of the spill. Following delineation, as recommended from Mike Bratcher with the NMOCD the following clean-up was performed: Test point A: 8 feet removed, B: 4' removed, C: 2' removed, and D: 4' removed. All material was taken to Lea Land for disposal and clean like material was brought in for backfill. Process pics were unable to be submitted on this report due to computer problems at the time of printing, therefore disposal tickets are attached to this report for proof of excavation.

Thanks,

Kelton Beaird

Sent: Friday, October 08, 2010 11:33 AM
To: Beaird, Kelton H
Subject: RE: Airport 35-1
Kelton,

This would be considered a risk based closure already. I am very reluctant to approve any remediation on the surmise that the site will be cleaned up at time of abandonment. The life expectancy of these facilities can be decades and there is no good way to assure that any issues now will be addressed that far into the future.

Mike

Sent: Friday, October 08, 2010 10:07 AM
To: Bratcher, Mike, EMNRD
Subject: RE: Airport 35-1
Importance: High

Mike,

With depth to groundwater in excess of 100', would it be possible to perform a risk based closure on this site, and remove 1' of material, install a liner and upon abandonment in the future, remove the remainder of the affected soil?

Thanks,

Kelton Beaird

Sent: Wednesday, October 06, 2010 8:19 AM
To: Beaird, Kelton H
Subject: RE: Airport 35-1

Kelton,

What we had discussed was the following:

- Area A – Removal of a minimum of 6' w/confirmation samples. Current analytical data shows clean at 8', but no info from 4' through the 8' interval. (If you wanted to remove to 8', we could go with latest data)
- Area B – Removal of a minimum of 3' w/confirmation samples or 4' removal based on latest analytical data.
- Area C – Removal of a minimum of 1' w/confirmation samples or 2' removal based on latest analytical data.
- Area D – Removal of a minimum of 3' w/confirmation samples or 4' removal based on latest analytical data.

I don't think I wrote down any notes while we were talking, but this is from my notes while reviewing the proposal. Call if you have any questions or concerns.

Mike Bratcher

Mike,

I seem to have lost the paper I wrote the requested proposal for the Airport 35-1 on, during our conversation last week. Could you please email me what your recommendations are on the remediation plan?

Thanks,
