Describe Cause of Problem and Remedial Action Taken.* The source of the release was at the well head. Produced water mixed with hydrocarbons were released and exited the location on the north side and flowed down hill to the north into an arroyo where the flow continued in a westward direction in the bottom of the arroyo. Visual evidence shows that some remedial action has taken place on the location and in the pasture immediately off location. The affected area is approximately 5' x 400'. Delineation will be conducted and a work plan will be submitted to NM OCD and BLM for review and approval.		
Describe Area Affected and Cleanup Action Taken.*		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
