Release Notification and Corrective Action

nkmlw 1109746451

Operator		<input checked="" type="checkbox"/> Initial Report	<input type="checkbox"/> Final Report
Name of Company - Oxy USA		Contact - Kelton Beaird	
Address - 1502 W Commerce		Telephone No. - (O) 575-628-4121 (C) 575-390-1903	
City Name - Indian Hills #9 (Trunk Line)		Facility Type - Tank Battery	
Lease Owner - BLM		Mineral Owner	Lease No. 30-015-28754

LOCATION OF RELEASE

Letter	Section	Township	Range	Feet from the	North/South Line	Feet from the	East/West Line	County
<i>B</i>	33	21S	24E					Eddy

Latitude 32°26.449 Longitude 104°30.036

NATURE OF RELEASE

Type of Release - Crude Oil & Produced Water	Volume of Release - 5000 bbls Water / 60 bbls Oil	Volume Recovered - 0
Type of Release - Truck Line	Date and Hour of Occurrence	Date and Hour of Discovery 12-9-09 12:00 pm
Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Mike Bratcher - NMOCD Jim Amos BLM	
Location? Kelton Beaird HES - Oxy	Date and Hour - See Above	
Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	
Watercourse was Impacted, Describe Fully.*		

Describe Cause of Problem and Remedial Action Taken.* The Truck line corroded spilling produced water and oil onto the surrounding surface and the site was delineated using a backhoe. The ranking criteria for the site is as follows: Surface Body of Water - 0 points; Wellhead Protection - 0 points; Groundwater Depth - 0 points (GW>100') The total ranking for this site is 0 points. RAL's for the site is Chloride 250 ppm, TPH - 5,000 and BTEX - 100 ppm (using field vapor headspace measurement). Attached are a plat map, field analytical and lab confirmations.

Describe Area Affected and Cleanup Action Taken.* A delineation of the site was completed using a backhoe. TP5 could only be delineated to 3' where impenetrable rock by backhoe was encountered. Due to the ranking criteria being 0 points and all TPH levels being below 5000 ppm, Oxy USA agrees to perform a cosmetic clean-up using a disc, and perforating the affected area. After the area is perforated using a disc, a conformation sample is taken to assure that the BTEX level at TP1 has dissipated to <100 ppm. Due to the depth of groundwater being well over 100' bgs, all chloride being below 800 ppm, and a layer of impenetrable rock, Oxy feels that there is no threat to future contamination of the groundwater. Therefore we will leave the chlorides in place. After we disc the area we will apply a combination of BLM Seed Mixture #3 and #4 and monitor for re-growth. A report will be submitted at the completion of the project.

OCD and BLM will be notified 48 hours in advance of any remediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability if their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other state, or local laws and/or regulations.
