Dear Mr. Brooks:

XTO Energy Inc. (XTO) hereby requests administrative approval for an unorthodox location for the above referenced well. Attached for your reference are the following exhibits:

1. Well location plat (NMOCD Form C-102)
2. Pictured Cliffs Ownership Map
3. Pictured Cliffs Production Map

The above captioned well was drilled and completed in April of 1964 as a W/2, 320 acre Dakota unit. The well produced from the Dakota formation before recently being inactivated due to a casing leak. XTO would now like to move uphole in the existing wellbore and recompleate the well to the Pictured Cliffs formation. The rules state that a well should be located no closer than 660' to the outer boundary of the 160-acre unit. Therefore the existing location will not conform to the current footage requirements and is encroaching on the NW/4 160-acre unit. A new well would not be economically feasible to drill for the Pictured Cliffs formation alone. The existing wellbore is in acceptable condition for the recompletion attempt. By moving uphole to the Pictured Cliffs formation, XTO would be able to minimize environmental impact while obtaining additional production.

XTO owns 100% of the offsetting operating rights in the Pictured Cliffs Formation in the NW/4 160-acre unit; therefore no offset owner notice is required. Taking this into account, in addition to the statements made above, XTO requests your administrative approval for the unorthodox location. Should you need any additional information, please feel free to contact me at (817) 885-3091.
