**AFFIDAVIT**

1. My name is Timothy Speer. I am a petroleum engineer for Nearburg Producing Company in the company's Midland, Texas office. I am familiar with the subject matter of this Application and am otherwise competent to testify to the matters set forth herein.
2. Nearburg Producing Company seeks approval of an unorthodox well location as follows:

Howenstine 12 Well No. 1  
API No. 30-025-40077  
500' FNL and 1594' FEL (B) (Surface)  
330' FNL and 1570' FEL (B) (Bottom hole)  
Section 12 , T17S, R37E Lea County, New Mexico
3. This well will be drilled to the Strawn formation. The applicable pool rules for the Shipp-Strawn pool in this area provide that wells must be located within 150 feet of the center of a quarter-quarter section.
4. I have examined geologic and geophysical data of the Strawn formation in the NE/4 of Section 12. The Strawn formation production in the area is typically from isolated algal mounds that are of limited areal extent. Based on my interpretation of the available data, I have concluded that a well drilled to the proposed bottom hole location will be better situated to more completely and efficiently recover Strawn formation reserves than would be likely if the well were drilled at a standard location. Further, because of the limited size of the isolated Strawn formation mound being targeted, the correlative rights of owners in the adjacent section are not likely to be impaired.

The E/2 SE/4 and W/2 SE/4 of Section 1 T17S R37E comprise the spacing units toward which the Howenstine 12 Well No. 1 encroaches. Applicant is the operator of the unit comprised of the E/2 SE/4 of Section 1. There is no existing unit for the W/2 SE/4, but Applicant advises that the ownership is identical. Nearburg owns or controls approximately 78% of the working interest or mineral interest in the offset. These owners were notified or provided waivers of objection and are identified on Exhibit A as

"Nearburg Internal Interest Owners". Another 20% of the interest owners are not owned or controlled by Applicant. They are also identified on Exhibit A and the dates of notification letters to them are reflected. Some of these interest owners also provided waivers.

The remaining 2% of the interest owners were un-locatable or current addresses were not available. Notice was sent to the last known addresses, where available. These interest owners were also notified by publication on March 16, 2011. The original Affidavit of Publication is attached as Exhibit B.

Exhibit C is comprised of copies of all notice letters sent as per Exhibit A, along with return receipts where available.

Exhibit D consists of copies of all waivers of objections, also indicated on Exhibit A.
