Describe Cause of Problem and Remedial Action Taken.* Arapahoe truck was hauling water from Chesapeake Pierce Canyon well and spilled it's load At the Remuda Basin 31-1 site. No liquid was recovered.

Describe Area Affected and Cleanup Action Taken.* An area approximately 100' x 100' was affected from the spill. Soil samples were taken at surface and one foot depths to determine impact. The site will be remediated to OCD standards by Ocotillo Environmental. A final report and C141 will be submitted following remediation activities.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
