Administrative Order PLC-21

Gentlemen:

Reference is made to your application dated June 21, 1965, wherein you request authority to commingle Glorieta and Abo production from your State 6-34 Lease comprising the S/2 of Section 34, Township 17 South, Range 35 East, and your State 4-27 Lease comprising the N/2 SW/4 and the W/2 SE/4 of Section 27, Township 17 South, Range 35 East, Vacuum Field, Lea County, New Mexico, after separately metering the Glorieta production and determining the Abo production by means of the subtraction method. It is our understanding that the ownership of each of the two leases is common throughout and that the production from each given pool will be allocated to the individual leases on the basis of periodic well tests.

Pursuant to the authority granted me under the provisions of Rule 303 (b) and Rule 309-B of the Commission Rules and Regulations, you are hereby authorized to commingle the production from the aforesaid pools and leases in the above-described manner. Provided, however, that the installation shall be operated in accordance with the provisions of the Commission "Manual for the Installation and Operation of Commingling Facilities," including the requirement for non-reset counters on the meters. You are also requested to notify the Hobbs District Office of the Commission at such time as the installation is complete in order that an inspection may be made of the installation prior to putting it in operation.

Administrative Order CTB-116 which authorized the commingling of the Abo production from the 4-27 Lease and the 6-34 Lease, and Administrative Order PC-270 which authorized the commingling of Glorieta and Abo production on the State 6-34 Lease, are hereby cancelled.

Very truly yours,

*A. L. Porter, Jr.*

Gentlemen:

After receiving and reviewing the information sent by you on your  
State Lease 4-27 and State Lease 6-34, we find no objection to your  
request to commingle, we therefore, grant you permission to do so,  
subject to approval by the Oil Conservation Commission.

Very truly yours,

Gentlemen:

We have no objection to the above request since owner-  
ship is common throughout. There are two things that  
we would like to know and that is:

1. The daily production, gravity and price  
from your State 4-27, and
2. The number of wells utilizing the LACT  
Unit on State 6-34 lease.

Upon your furnishing us this information, we will  
formally grant your request.

Very truly yours,

R. S. JOHNSY WALKER
