RE: Authorization to Commingle at Surface
the Western Reserves Fed. #2 with the
already commingled Devon Federal #3
and Cactus "9B" Federal #2
Section 9-21S-26E
Eddy County, NM

Gentlemen:

This is our application for administrative approval to surface commingle gas production from the referenced leases. This production will be commingled at the surface in order to more economically produce and market gas from the wells.

These are federal leases and like application has been made to Bureau of Land Management. A copy of that application is attached. No liquids will be commingled. A schematic of the proposed operation, a plat showing all wells to be commingled and the pool from which each well produces are all included in the BLM filing.

Please direct inquiries concerning this matter to Wally Frank at (405) 552-4595.

Yours truly,

DEVON ENERGY CORPORATION (NEVADA)

Candace R. Graham (405) 552-4520

APPLICATION FOR SURFACE COMMINGLING
OFF LEASE STORAGE AND MEASUREMENT APPROVAL

To: Bureau of Land Management
P.O. Box 1778
Carlsbad, New Mexico 88221-1778

Devon Energy Corporation (Nevada) is requesting approval for surface commingling and off-lease measurement of Natural Gas hydrocarbon production only from the following formation and well of Federal lease No. RNM126; Lease Name: Western Reserves Federal #2

<u>Well No.</u>	<u>Loc.</u>	<u>Sec.</u>	<u>Twp.</u>	<u>Rng.</u>	<u>Formation</u>
2	SW/NE	4	21S	26E	Canyon

with Natural Gas hydrocarbon production only from the following formation and wells already approved for surface commingling and off-lease measurement on Federal lease No. NM0400877 Lease Name; Cactus "9B" Federal #2 & Devon Federal #3.

<u>Well No.</u>	<u>Loc.</u>	<u>Sec.</u>	<u>Twp.</u>	<u>Rng.</u>	<u>Formation</u>
2	NW/NE	9	21S	26E	Delaware
3	SW/NE	9	21S	26E	Delaware

Production from the wells involved is as follows:

<u>Well Name and No.</u>	<u>BOPD</u>	<u>Oil Gravity</u>	<u>MCFPD</u>
Devon Federal #3	36	41.5° @ 68°F	169
Cactus "9B" Federal #2	4	40.5° @ 60°F	53
Western Reserves Fed. #2	0.5	52.0° @ 68°F	125

The proposed operation is described in detail on the attached diagrams.

A map is enclosed (Attachment A) showing the lease numbers and locations of all leases within the affected area. The Federal leases cover Section #4 & #9 where the wells are located. The off lease measurement site is located NE/NW of Section 16, T21S, R26E on State lease No. L-6705 (Attachment B). Neither the Delaware nor Canyon producing zone is unitized or communitized.

A schematic diagram (Attachment C) is also attached which clearly identifies all equipment that is being utilized.

The off lease measuring facility is located in the NE/NW of Section 16, T21S, R26E on State lease No. L-6705, Eddy County, New Mexico. The BLM will be notified if there is any future change in the facility location.

Details of the method for allocating production to contributing sources are as follows:

Application for Surface Commingling, Off Lease Measurement Approval
Lease No. NM0400877 & RNM126 - Devon Fed. 3/Cactus "9B" Fed. 2 & Western Res. Fed. 2)
Sections 4&9-21S-26E, Eddy County, New Mexico
January 5, 1999
Page Two

The natural gas from the Western Reserves Federal #2, Devon Federal #3 and the Cactus "9B" Federal #2 is the only hydrocarbon being commingled, measured, and sold off-lease. Each of the wells has it's own orifice check meter. These check meters will be used to allocate production back to each well from the common, off-lease, sales point.

The working interest owners have been notified of this proposal.

The commingling of production is in the interest of conservation and waste and will result in the most effective, economic means of producing the reserves in place from the Western Reserves Federal #2 and will not result in reduced royalty or improper measurement of production from the Cactus "9B" Federal #2 or the Devon Federal #3.

The proposed commingling will result in increased production from the marginally economic Western Reserves Fed. #2 and is necessary for the reserves development and continued operation of the above referenced Federal lease.

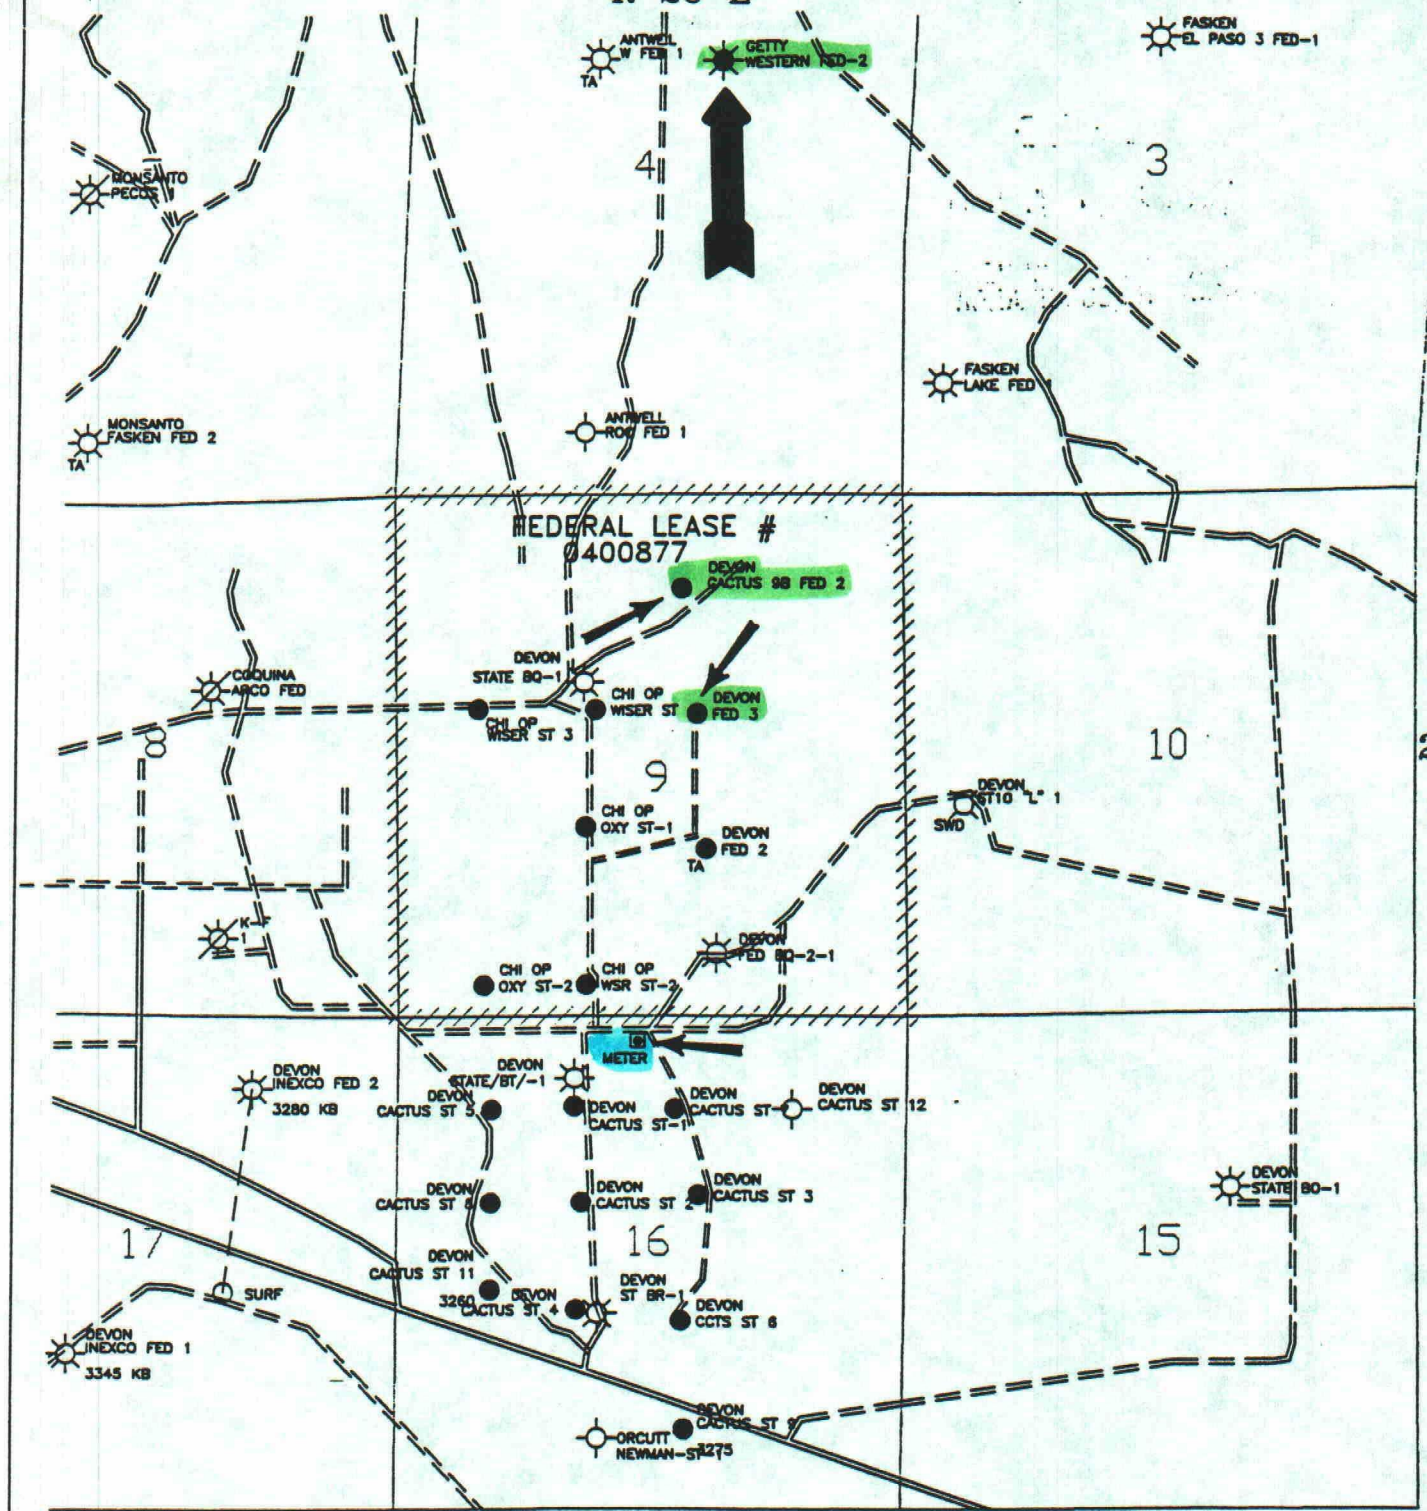

Devon Energy Corporation (Nevada) understands that the requested approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument. And, Devon Energy Corporation (Nevada) will submit within 30 days an application for right-of-way approval to the BLM's realty section in your office if we have not already done so.

Additional wells require additional commingling approvals.

Devon Energy Corporation (Nevada)

Western Reserves Fed. #2
With the already commingled
Delaware Pool
Devon Federal #3 and
Cactus "9B" Federal #2
Sec. 9-T21S-R26E
Eddy County, New Mexico

Gentlemen:

This is to inform you, per BLM regulations, of our intention to surface commingle gas production from the referenced pool. We have attached a copy of our application to the BLM and wish to call your attention to a few items. First, please note that the legal locations of all wells included in this commingling are itemized. Second, please note the planned method of allocating gas production from each of the wells. We have also notified the NMOCD of our intentions in this matter.

We anticipate commingled gas sales of about 340 MCFD. If you need additional information, please advise.

Sincerely,

DEVON ENERGY CORPORATION

Walter M. Frank
District Engineer

ADMINISTRATIVE ORDER OLS-181

Devon Energy Corporation
20 North Broadway, Suite 1500
Oklahoma City, Oklahoma 73102-8260

Attention: Ms. Candace Graham

The above named company is hereby authorized to commingle East Catclaw Draw Delaware (10500) Pool production from the following wells:

Lease: ~~Devon~~ Federal Well No.3 (Federal Lease No.NM-0400877)
Description: SW/4 NE/4, and,

Lease: Cactus '9B' Federal Well No.2 (Federal Lease No.NM-0400877)
Description: NW/4 NE/4,

both located in Section 9, Township 21 South, Range 26 East, NMPM, Eddy County, New Mexico.

The aforementioned production is to be transported prior to measurement at the gas sales meter facility located in Unit Letter 'C' of Section 16, Township 21 South, Range 26 East, NMPM, Eddy County, New Mexico. Such gas production shall be allocated to the above described lease by separate orifice meter measurement at each well. Liquid production will not be commingled.

NOTE: This installation shall be installed and operated in accordance with the applicable provisions of Rule 303 of the Division Rules and Regulations and there shall be no intercommunication of the handling, separating, treating or storage facilities designated to the above lease with any other lease prior to a central sales meter.

FURTHER: The operator shall notify the Artesia district office of the Division prior to implementation of the commingling process.

DONE at Santa Fe, New Mexico, on this 29th day of September, 1997.

WILLIAM J. LEMAY,
Division Director

WJL/BES
