RE: Application to Surface Commingle  
E. L. Steeler & Eva Blinbry Leases  
Jalmat and Langlie-Mattix Pools  
Sections 19 & 30, T-23-S, R-37-E  
Lea Co., NM

Mr. Ashley:

Per our phone conversation yesterday regarding changing the location of the gas compressor from Section 19 to Section 30, on our surface commingle application for the leases listed above. Attached is another schematic of the plan with the changes and all wells except the Blinbry #2 will have an individual meter. The volume for Blinbry #2 will be determined by deducting the volume of the other wells from the master sales meter. All meters will be electronic flow measurement devices that are very reliable and accurate.

ARCO will surface commingle by gathering gas from one lease, transport to another lease, compress the gas in one compressor, and sell through one central sales point. The gas will be metered separately prior to movement off lease and the individual lease volumes will be allocated back to each lease based on the ratio of the lease volumes to the total sales volumes. The two leases are the:

E.L. Steeler Well Nos. 3, 4, & 5 - S/2 of Sec. 19, T-23-S, R-37-E, Lea Co. NM  
Eva Blinbry Well Nos. 2 & 7 - N/2 of Sec. 30, T-23-S, R-37-E, Lea Co. NM

Your cooperation in this matter will be appreciated. If you have any questions, please contact me at 915/688-5570. Please send your approval to proceed to my attention at the address listed above.

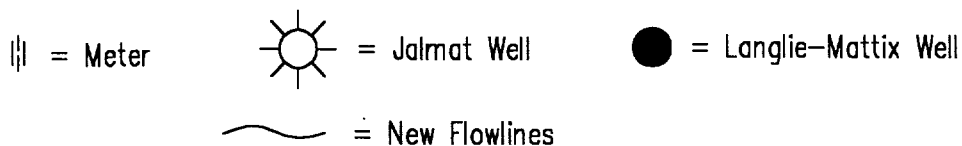

Yours very truly,

Elizabeth A. Casbeer
