

# CITIES SERVICE OIL COMPANY

BOX 97

HOBBS, NEW MEXICO

September 1, 1960

State of New Mexico  
State Engineer's Office  
P. O. Box 1079  
Santa Fe, New Mexico

Attention: Mr. Frank E. Irby

Gentlemen:

Attached is a diagramatic sketch of the Cities Service Oil Company operated Drickey Queen Sand Unit, Tract 13, Well 7, SE/4 SE/4 Sec. 33, T-13S, R-31E, Caprock Queen Pool, Chaves County, New Mexico, as requested by your letter of August 29, 1960.

In our original application to the New Mexico Oil Conservation Commission dated August 22, 1960, requesting conversion of the subject well, it was stated the well would be equipped with plastic coated tubing and a packer to prevent a possible contamination of fresh water sand in the event of a casing leak.

If further information is necessary concerning this matter, please advise.

Yours very truly,

E. F. Motter,  
Assistant Division Engineer

ADDRESS CORRESPONDENCE TO  
P. O. BOX 1079  
SANTA FE, N. M.

Mr. E. F. Motter  
Assistant Division Engineer  
Cities Service Oil Company  
Hobbs, New Mexico

Dear Mr. Motter:

Reference is made to your application to the Oil Conservation Commission which seeks administrative approval for the conversion of a well in Tract 13, Well No. 7, SE $\frac{1}{4}$ SE $\frac{1}{4}$  Section 33, Township 13 South, Range 31 East to a water injection well, dated August 22, 1960. No information whatsoever is available to this office with regard to the construction of the well and the method of injection to be employed in the event this application is approved. In the absence of such information, this office must oppose the granting of the application until information is submitted which will show that injection through this well will not constitute a threat to any fresh waters which may exist in the area. If it is convenient for you to submit to me a detailed diagrammatic sketch showing the casing and cementing program employed in the original construction of this well and a statement as to whether or not tubing and packer will be used in the injection, I will be able to determine what the position of this office should be and notify both you and the Secretary-Director of the Commission at an early date.

Yours truly,

S. E. Reynolds  
State Engineer
