New Mexico Oil Conservation Commission
Secretary-Director
Mr. A. L. Porter, Jr.
Box 2088
Santa Fe, New Mexico

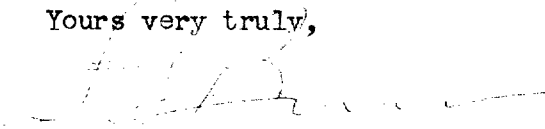

Dear Sir:

Sinclair Oil & Gas Company requests administrative approval for the conversion of Keel "B" #28 from a single to a dual water injection well.

This is to be accomplished by injecting thru the tubing below the Vacuum zone and into the casing annulus into the upper zones. This well was previously authorized by administrative Order WFX-219 dated November 5, 1965. The well was completed as shown on the attached schematic with the 8-5/8" casing set into the top of the Rustler with the cement circulated to surface. The cement top by temperature survey, is at 2220' behind the 4-1/2" casing string.

By copy of this letter we are requesting approval of the State Engineer.

Yours very truly,

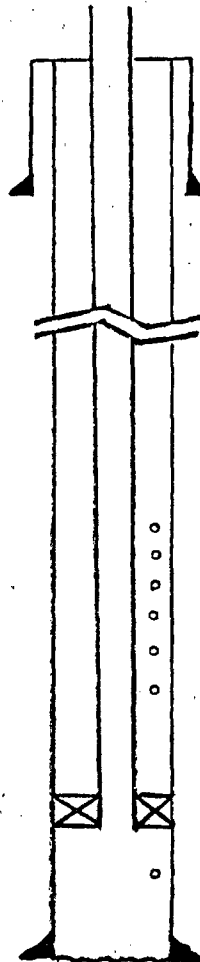

W. F. Burns
Superintendent

ADDRESS CORRESPONDENCE TO:
STATE CAPITOL
SANTA FE, NEW MEXICO 87501

Mr. A. L. Porter, Jr.
Secretary-Director
Oil Conservation Commission
Santa Fe, New Mexico

Dear Mr. Porter:

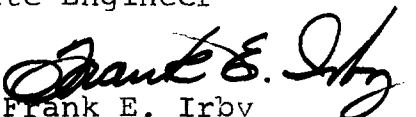

Reference is made to the application of Sinclair Oil & Gas Company which seeks administrative approval for the conversion of their Keel "B" No. 28 from a single water injector to a dual water injector.

After reviewing the letter and the diagrammatic sketch attached thereto, I find no reason to object to the granting of the application.

FEI/ma
cc-Sinclair Oil & Gas Co.
F. H. Hennighausen

Yours truly,

S. E. Reynolds
State Engineer
