Re: Order R-4589-A  
Seven Rivers Queen Unit  
Polymer Augmented  
Waterflood Project

Dear Mr. Parker:

Please forward copies of the step-rate tests conducted on your polymer injection wells in the subject tertiary recovery project. Finding 18 of Order R-4589-A specifies that pressure limits be determined with step-rate tests run in cooperation with our Hobbs District office. I would like to verify and substantiate Division records with the step-rate data obtained in your tests.

If you have any questions concerning my needs please call me at 827-5807.

Sincerely,

*Gilbert P. Quintana*
