Attention: Michael J. Newport

RE: Injection Pressure Increase, Five Wells in the Lovington San Andres Unit Waterflood Project. Lea County, New Mexico

Dear Mr. Newport:

Reference is made to your request dated March 3, 1993 to increase the surface injection pressure on five wells in the Lovington San Andres Waterflood Project. This request is based on step rate tests conducted on these wells between February 2 and 5, 1993. The results of the tests have been reviewed by my staff and we feel an increase in injection pressure on these wells is justified at this time.

You are therefore authorized to increase the surface injection pressure on the following wells:

Well and Location	Maximum Injection Surface Pressure
LSAU No. 8 2310' FNL - 1980' FWL Unit F, Section 31, Township 16 South, Range 37 East	1750 PSIG
LSAU No. 12 1980' FSL - 1980' FWL Unit K, Section 36, Township 16 South, Range 36 East	1925 PSIG
LSAU No. 31 660' FNL - 1980' FWL Unit C, Section 1, Township 17 South, Range 36 East	2150 PSIG

Injection Pressure Increase Greenhill Petroleum Corporation March 16, 1993 Page 2

Well and Location	Maximum Injection Surface Pressure
LSAU No. 33 660' FNL - 660' FEL Unit A, Section 1, Township 17 South, Range 36 East	2193 PSIG
LSAU No. 40 1980' FNL - 660' FEL Unit H, Section 1, Township 17 South, Range 36 East	1750 PSIG

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Sincerely, O A William J. LeMay Director WJL/BES/amg Oil Conservation Division - Hobbs cc: David Catanach File: WFX-615 WFX-632 Case No. 10154
