Re: Request for Administrative Approval to
Convert Producing Well to Water Injection Well
West Bisti Unit
San Juan County, New Mexico

Gentlemen:

In accordance with the provisions of Rule 10 of Order R-1638 of the New Mexico Oil & Gas Conservation Commission, we hereby solicit administrative approval to convert WBU No. 60, located NW NE Sec. 30-26N-13W, San Juan County, New Mexico, to a water injection well for the West Bisti Unit pressure maintenance project. The following listed exhibits are attached to support this application for administrative approval:

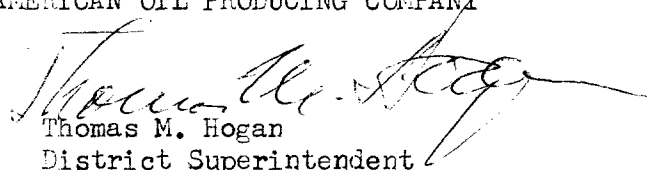

- (1) A plat showing location of well proposed for conversion to an injection well and also showing all wells within the project area and offset operators and locating wells which offset the project area.
- (2) A schematic drawing of the proposed injection well installation and hookup.

A copy of this application has been mailed this date to the offset operators of the proposed injection well. Inasmuch as Elliott, Inc. and Skelly Oil Company (the only offset operators to the proposed injection well) are also Working Interest Owners in the West Bisti Unit, we are asking them to provide your office with Waivers of Objection to this application.

We will sincerely appreciate immediate approval of this application subject to your receipt of Waivers of Objection from Skelly and Elliott.

Very truly yours,

THE BRITISH-AMERICAN OIL PRODUCING COMPANY

Thomas M. Hogan
District Superintendent
