*PMX-1  
Waiting Period  
Due Wed Sept 11*

Mr. A. L. Porter, Jr., Secretary-Director  
New Mexico Oil Conservation Commission  
P. O. Box 871  
Santa Fe, New Mexico

Dear Sir:

In compliance with paragraph "e" of Rule 9, Order Number R-1191, we request your approval of the conversion of our Breech "A" T-207 to a water injection well. This well is located 660' from the south line and 1980' from the east line of section 10-26N-6W, Rio Arriba County, and is part of the South Blanco Tocito Water Injection Project.

*0-10-26N-6W*

The present production from this well is 6 barrels oil and 220 barrels water per day. It cannot be operated profitably at that rate and it is our belief that it would now be more valuable to the project if used for water injection.

All of the South Blanco Tocito Water Injection Project is on Federal land at present and Geological Survey Form 9-331a is attached showing their approval of the proposed conversion by Mr. P. T. McGrath, District Engineer for the Survey in this district.

El Paso Natural Gas Products Company is the only operator offsetting the Project and they are being notified of the proposed conversion by copy of this letter.

Yours very truly,

CAULKINS OIL COMPANY

Frank Gray

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Present production from this well is 6 barrels of oil and 220 barrels water per day approximately. It is now proposed to use it for the injection of water, injection to start September 8, 1961 at approximately 700 barrels per day.

**I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.**
