Santa Fe, NM 87504-2088

ATTENTION: Mr. William LeMay  
Director

RE: Surface Commingling, Lease Commingling  
and Off-Lease Storage  
North Dagger Draw Upper Penn Pool  
Eddy County, New Mexico

Dear Mr. LeMay:

Yates Petroleum Corporation respectfully requests administrative approval to commingle production from three wells into a common tank battery and to permit production from each well to be transported prior to measurement to another well for storage thereon. It is proposed to commingle the production from the following three wells:

Ross EG Federal Com #9  
Unit I, 1980 FSL & 660' FEL  
Section 19-T19S-R25E  
Eddy County, New Mexico  
NM-0557142

Chamiza AJC Com #1  
Unit O, 990 FSL & 1980' FEL  
Section 19-T19S-R25E  
Eddy County, New Mexico  
Fee Lease

Parish IV Com #1  
Unit J, 1980' FSL & 1980' FEL  
Section 19-T19S-R25E  
Eddy County, New Mexico  
Fee Lease

The production from these three wells will be commingled into a common storage facility located on the Parish IV Com #1 location. A map labeled Attachment I is enclosed for your information.

The purpose of this off-lease storage and surface commingling is to reduce operating costs for storage and treating and thereby extend the economic life of each well. Without approval for utilizing existing batteries on adjacent leases, it will become necessary to build separate facilities for each well. This will greatly increase costs and shorten the economic life of the well.

Off-Lease Storage, Etc.:

Page 2:

October 12, 1993

Because working interests for the proposed wells are different from the well where the proposed storage facilities are located, oil from each of the wells will be measured by positive displacement, temperature compensated, metering equipment prior to surface commingling. Gas from the wells will also be metered separately. This metering will ensure that all production from each of the wells is equitably accounted for with no significant effect on your revenue. The production in all three wells will be from the same producing zone which is the Canyon.

In accordance with the Oil Conservation Division's Rules 303-B, 309-B and 309-C, the following diagrams and maps are submitted for your information.

Attachment II                      A diagram of the proposed measurement equipment, separators and storage tanks in accordance with the "Manual for Installation and Operation of Commingling Facilities".

Attachment III                     Notification of working interest owners of the proposal to commingle production.

Attachment IV                      Notification to the Bureau of Land Management.

Yates Petroleum Corporation appreciates your cooperation in this matter. If you should have any questions or need further information, please give me a call at 505-748-1471.

Thank you.

Sincerely,

A handwritten signature in cursive script that reads "Rusty Klef".

Rusty Klef  
Production Clerk
