RE: Request for Administrative  
Approval to commingle oil from  
Getty Oil Company's State "AP"  
and Hobbs "N" Leases both pro-  
ducing from the Vacuum Abo Reef  
Pool. Sec. 8 & 9, T-18S, R-35E,  
Lea County, New Mexico

Gentlemen:

Getty Oil Company respectfully requests approval to commingle the oil production on its State "AP" and Hobbs "N" Lease in accordance with Rule 309-B of the New Mexico Oil Conservation Commission Rules and Regulations.

In support of this application the following information is submitted:

1. All production will be from the Vacuum Abo Reef pool.
2. Working interest ownership and royalty ownership is common for these two (2) leases. Getty is 100% WI owner of both leases and the State of New Mexico receives 100% of the royalty from both leases.
3. Attached is a plat showing the location of the wells and leases.
4. Attached is a schematic diagram of the proposed commingling facility located on the Hobbs "N" Lease.
5. Production is to be allocated based on monthly well tests.

There is presently one well on the Hobbs "N" Lease producing approximately 210 BOPD. There will be a new well drilled on the Hobbs "N" Lease and one drilled on the State "AP" Lease. In the interest of conservation and for greater economic operation of these leases, Getty Oil submits this request to commingle the production for these two leases.
