## SINCLAIR OIL & GAS COMPANY

Box 1920  
Hobbs, New Mexico  
March 24, 1965

*Approved  
PC 219*

New Mexico Oil Conservation Commission  
P. O. Box 2088  
Santa Fe, New Mexico

Attention: Mr. A. L. Porter, Jr.

Gentlemen:

Sinclair Oil & Gas Company currently commingles the oil production from the Blinebry Oil Pool and the Drinkard Pool under Administrative Order PC-219 on the S. J. Sarkeys lease in the SE/4 of Section 23, Township 21 South, Range 37 East, Lea County, New Mexico. The Blinebry production is metered and the Drinkard production is determined by the subtraction method.

The S. J. Sarkeys Well No. 4 was recently completed in the Wantz Abo Pool as a top allowable producer. The well is scheduled to become a Blinebry-Drinkard-Abo oil-oil-oil-triple completion.

It is requested that an exception to State wide Rule 303 be granted to permit commingling of the oil produced from the Blinebry Oil, the Drinkard and the Wantz Abo Pools on the S. J. Sarkeys lease by separate metering of the Blinebry and Abo oils and by determining the Drinkard production using the subtraction method.

	<u>Current Monthly Production</u>	<u>API Gravity</u>	<u>Price per Barrel</u>
Blinebry	4555	40.4	\$3.01
Drinkard	3178	41.0	\$3.01
Wantz Abo	2730	41.7	\$3.01

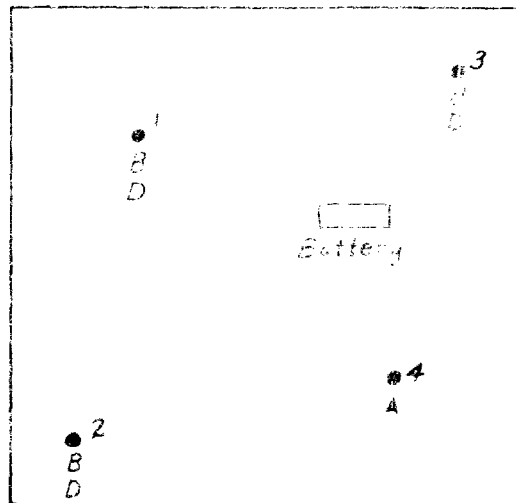

The value of the crude oil mixture will be \$3.01 per barrel and will have a gravity of 41.3° API. All the zones have common royalty.

An early approval of this application would be appreciated.

Very truly yours

*Fred Burns*  
Fred Burns
